

Anatomia ucha

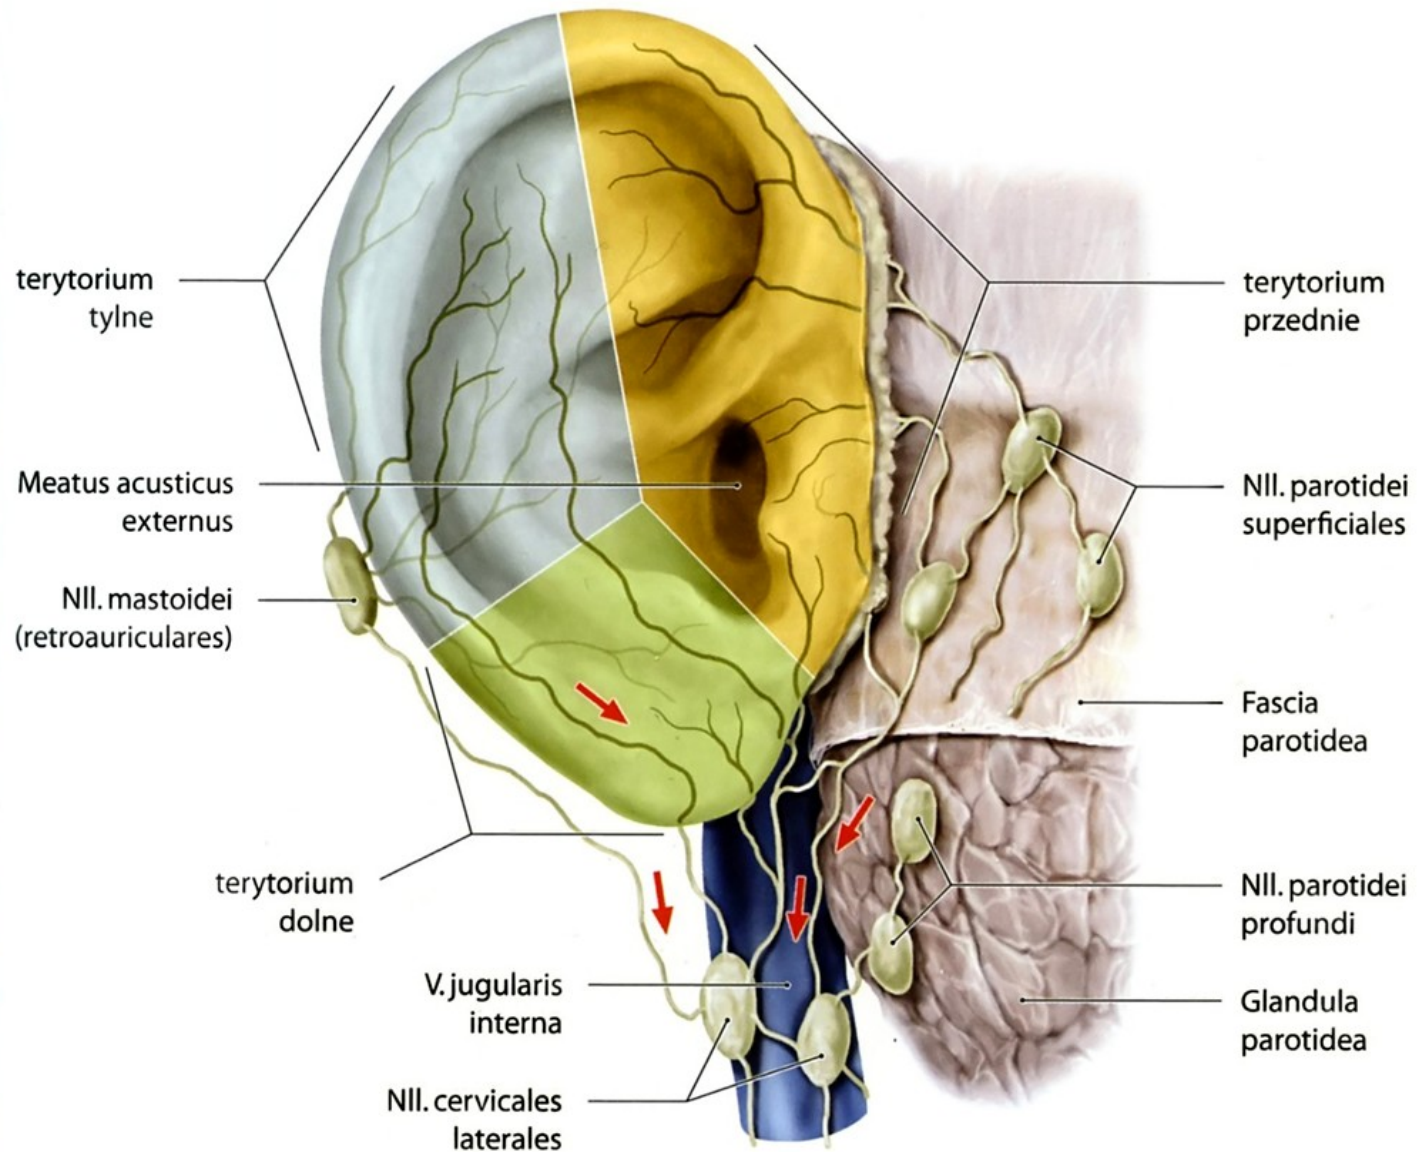

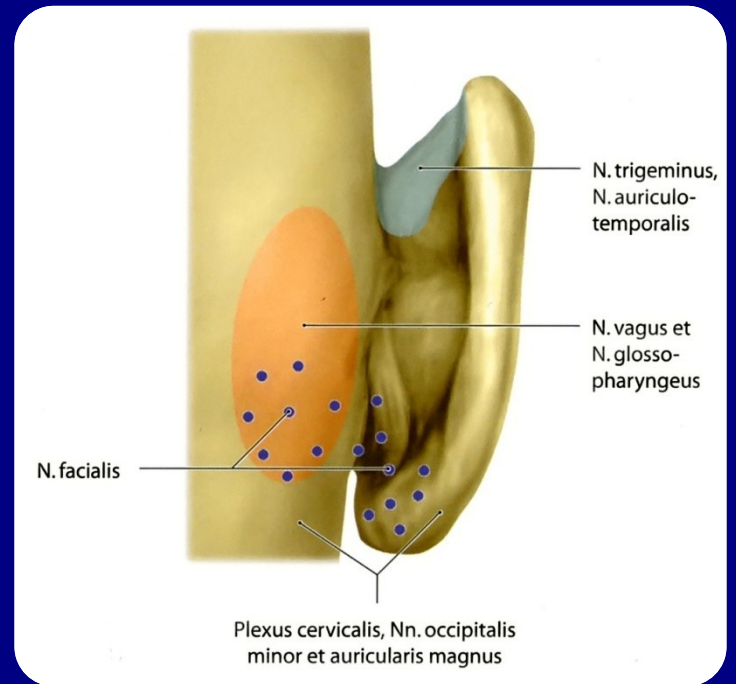

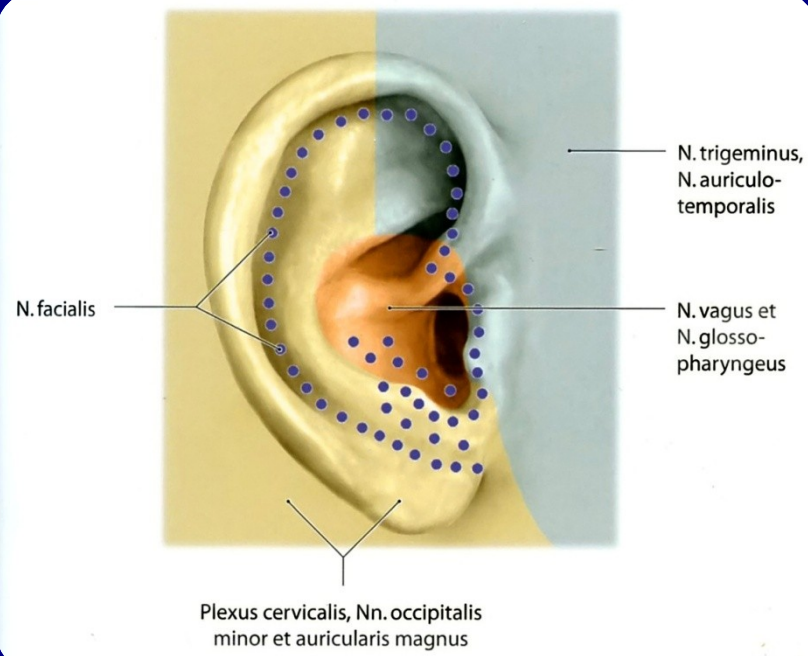

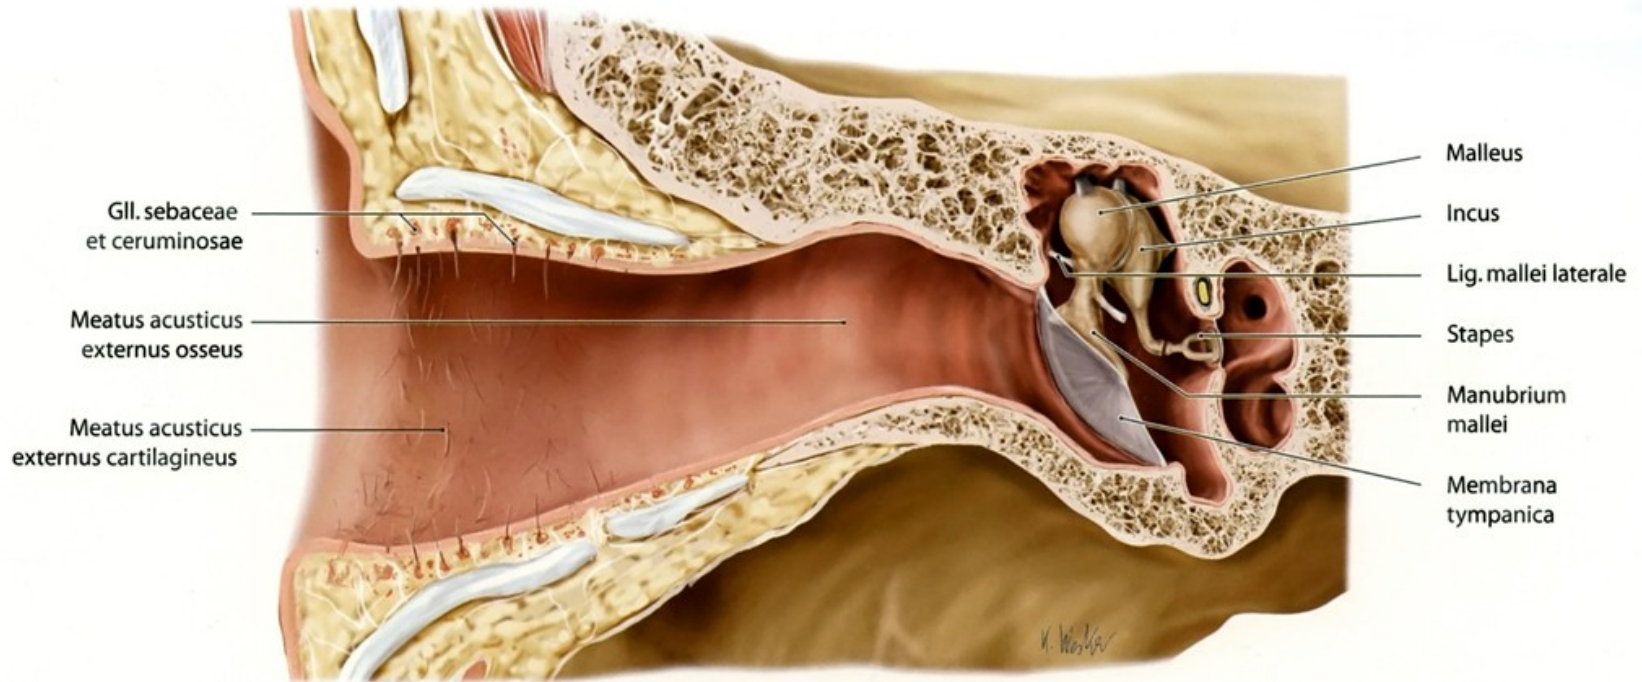

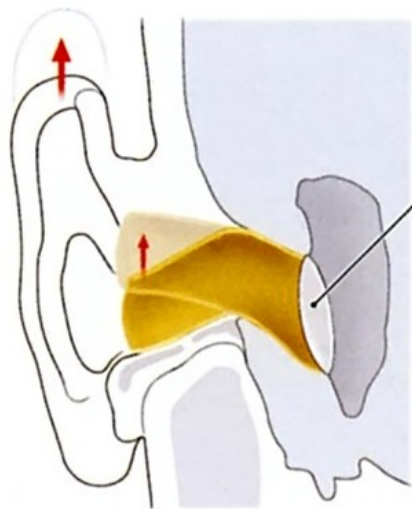

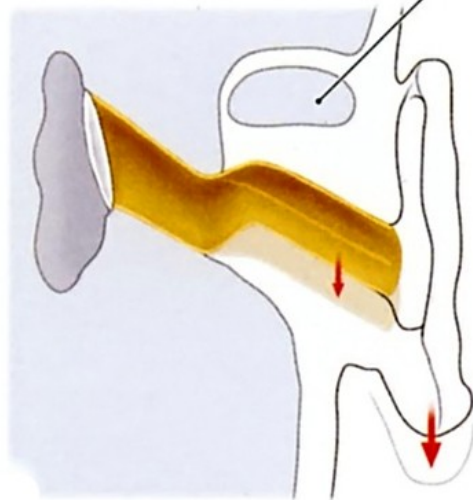

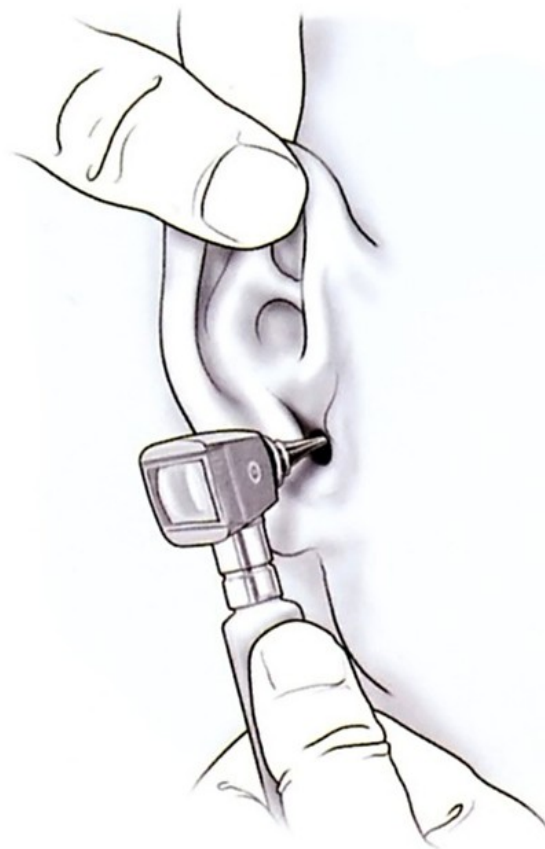

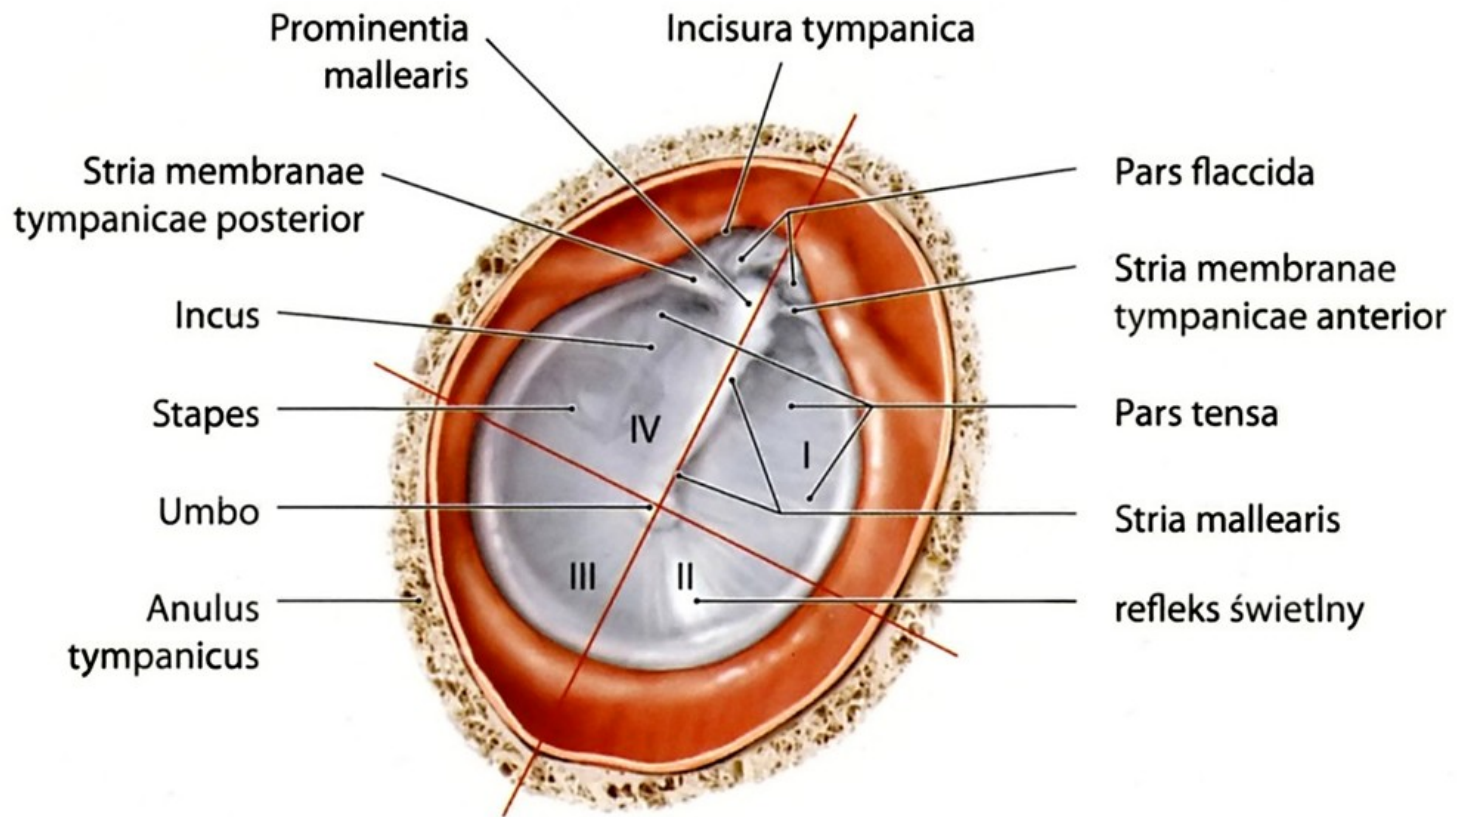

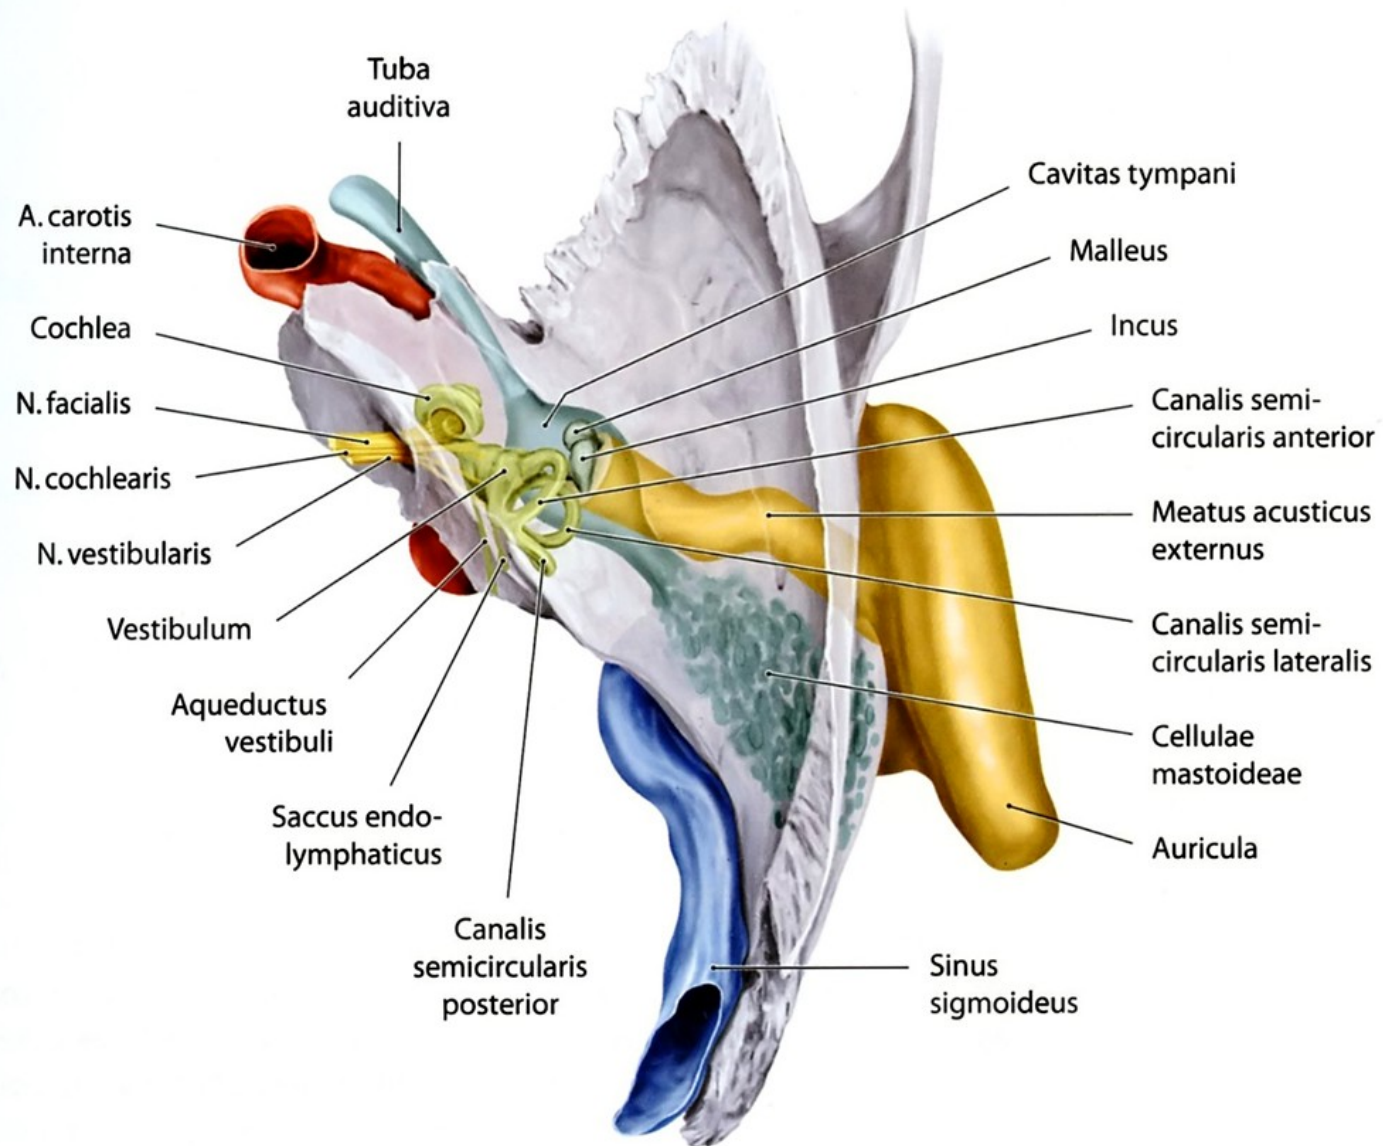

błona bębenkowa

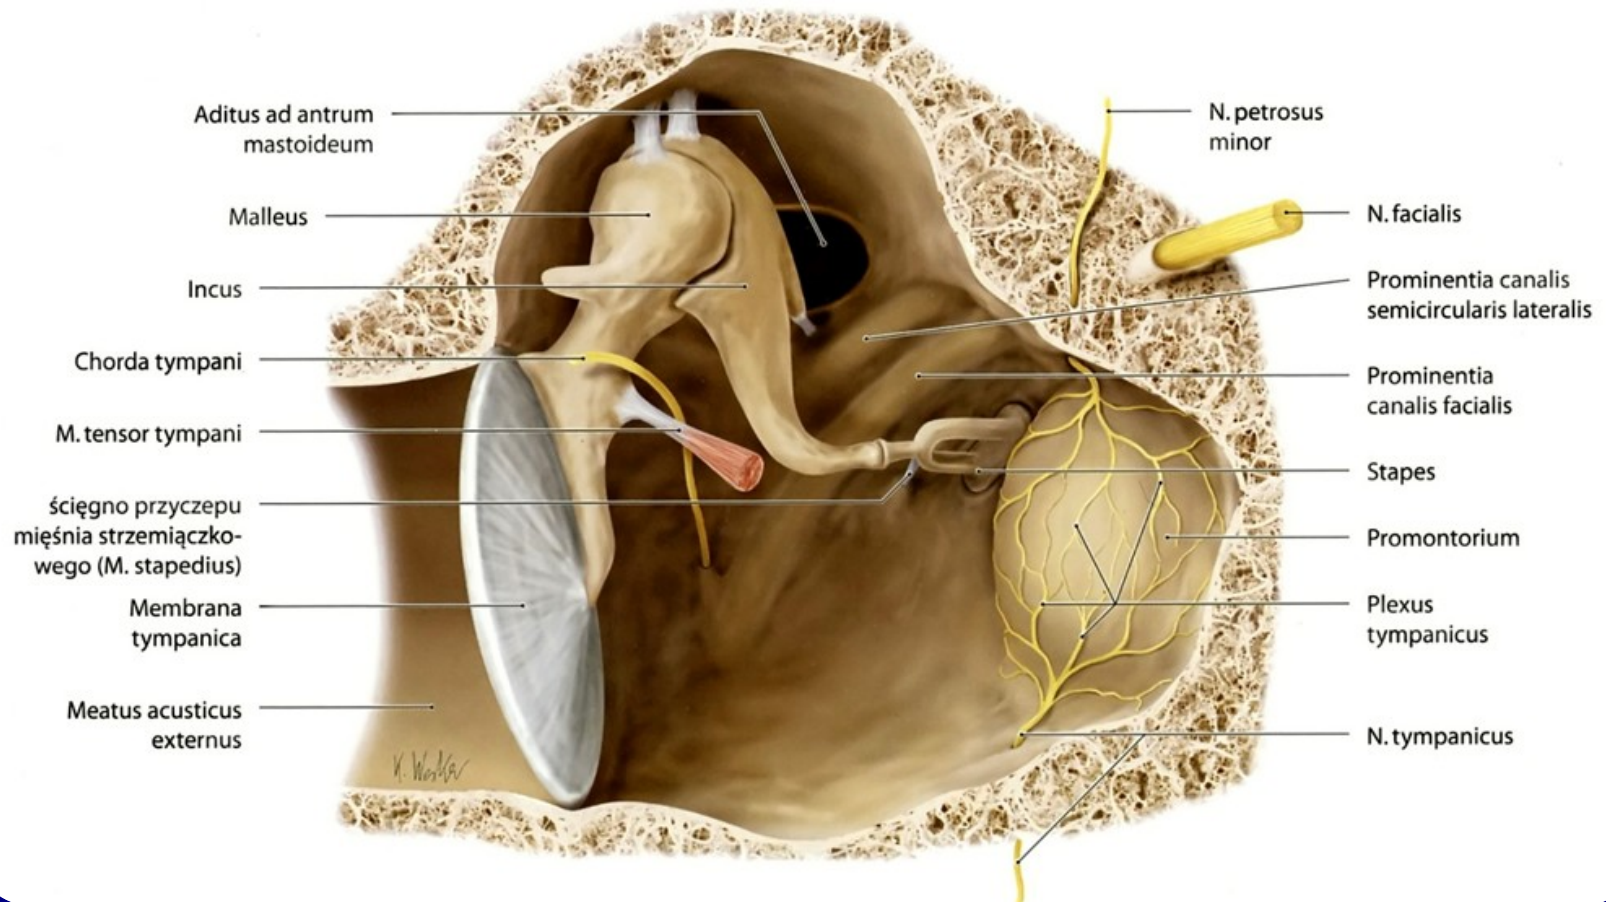

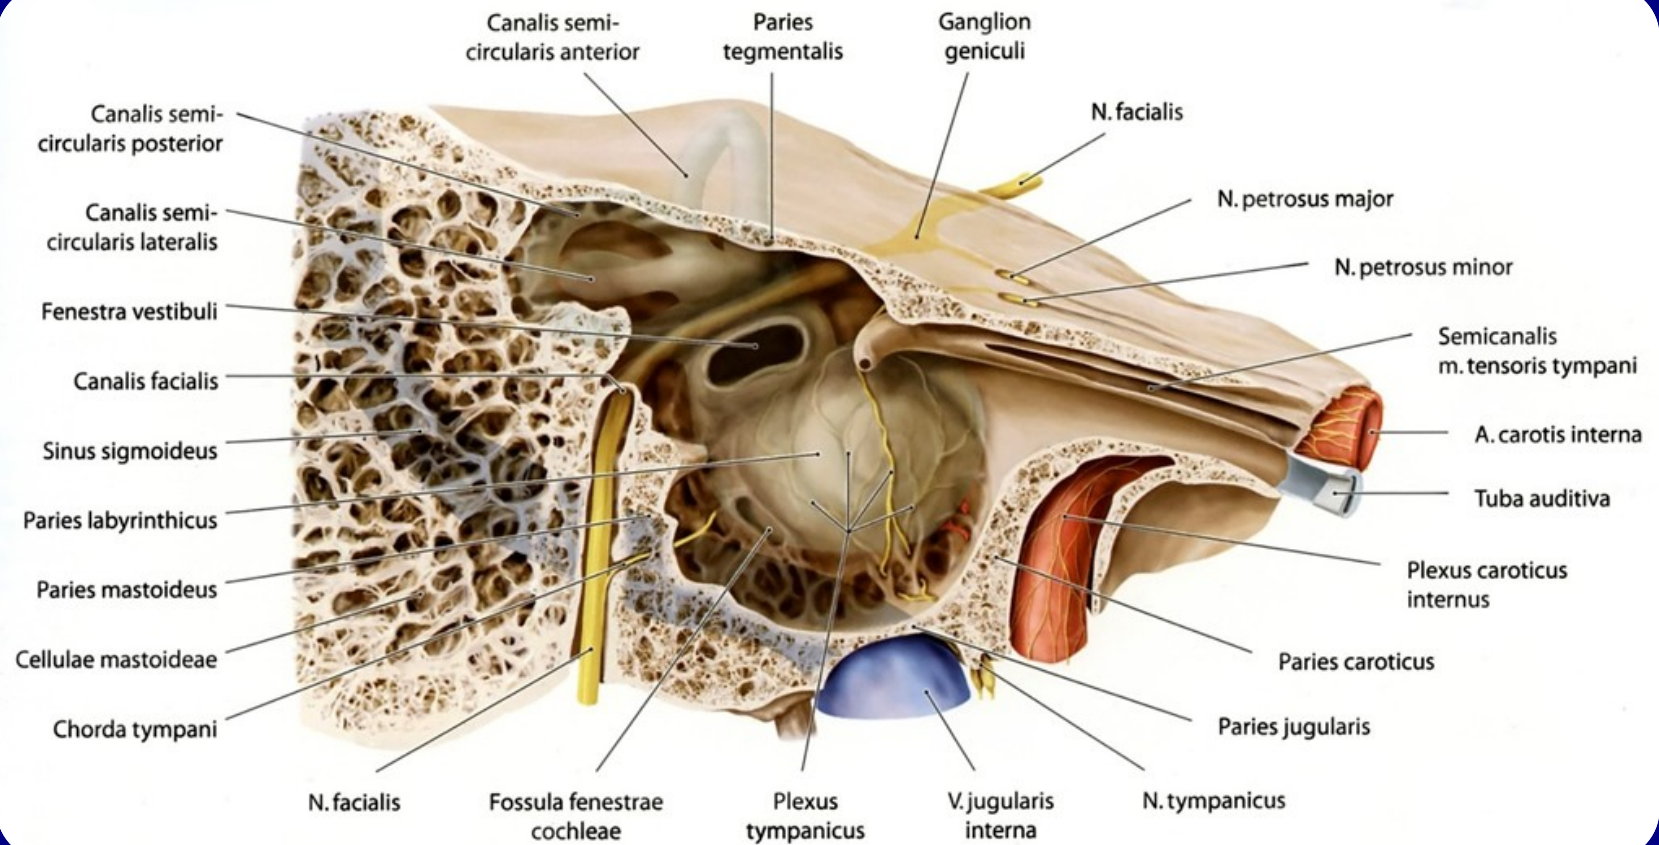

Caput mandibulae

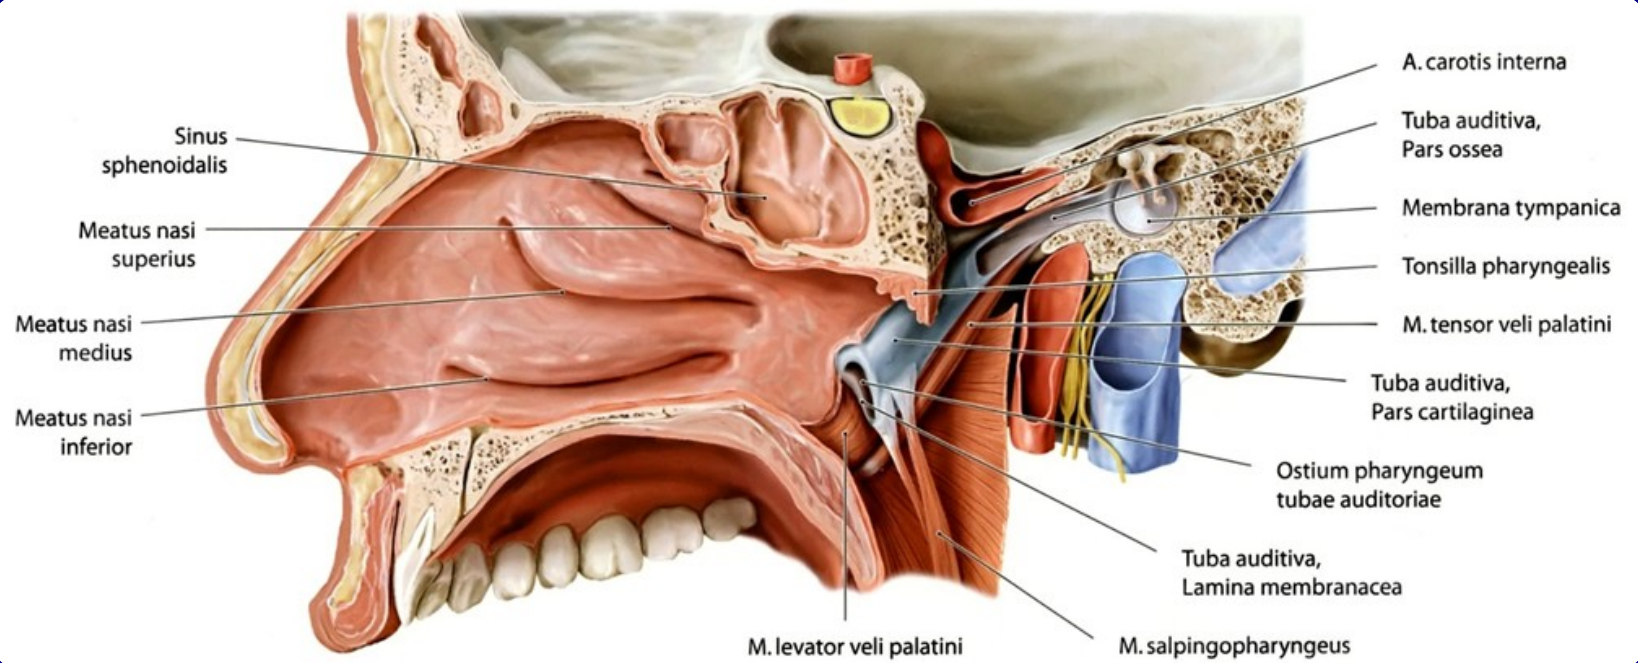

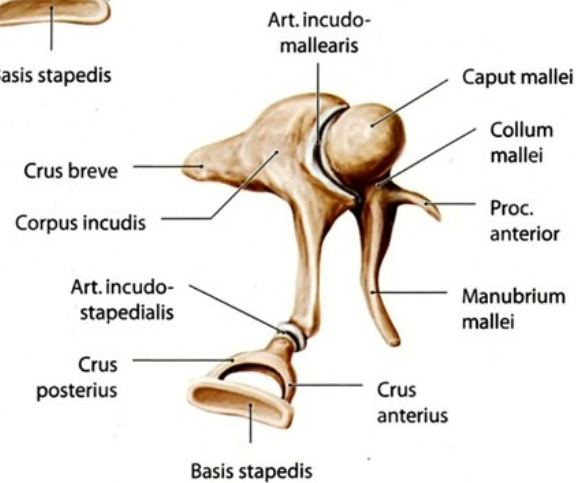

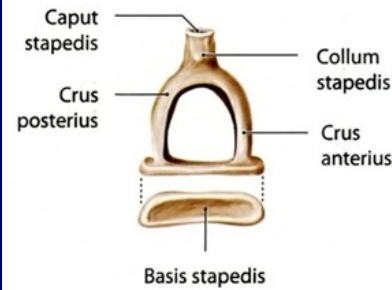

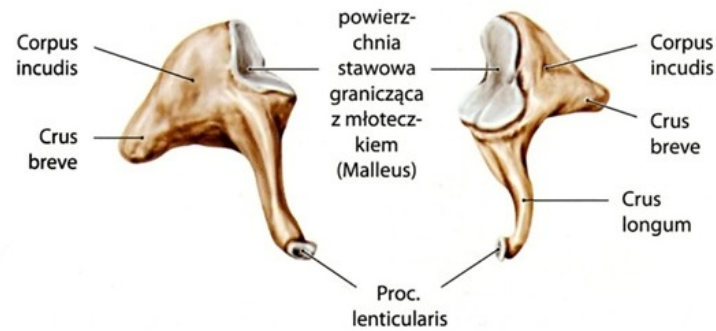

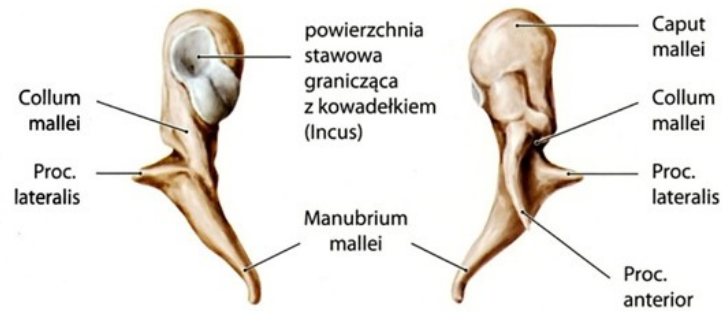

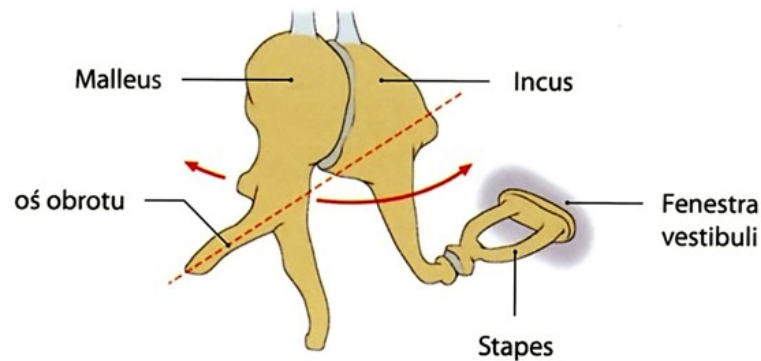

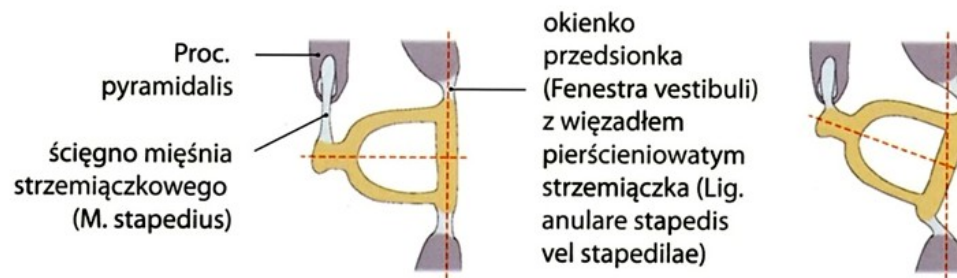

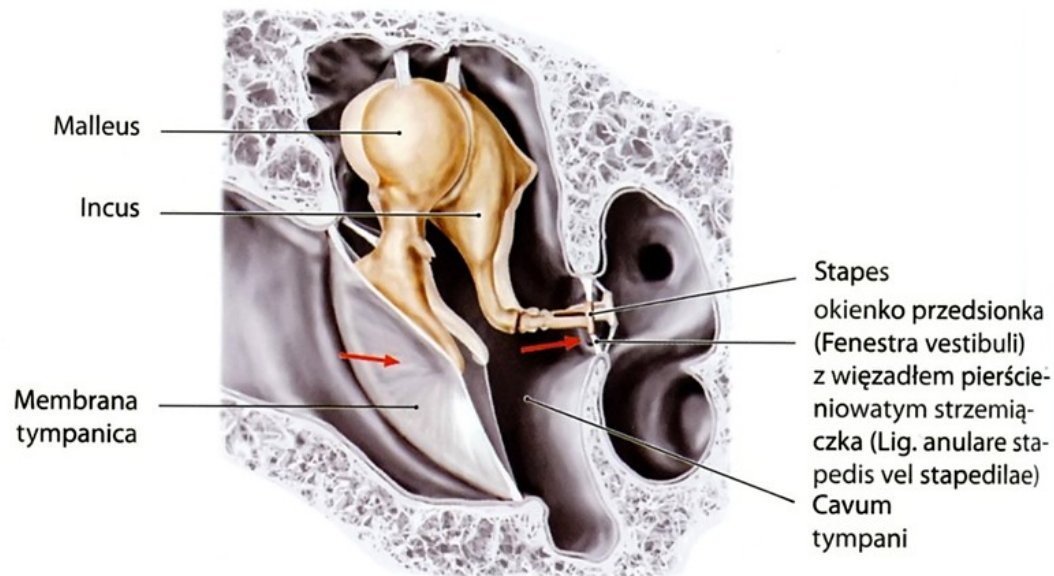

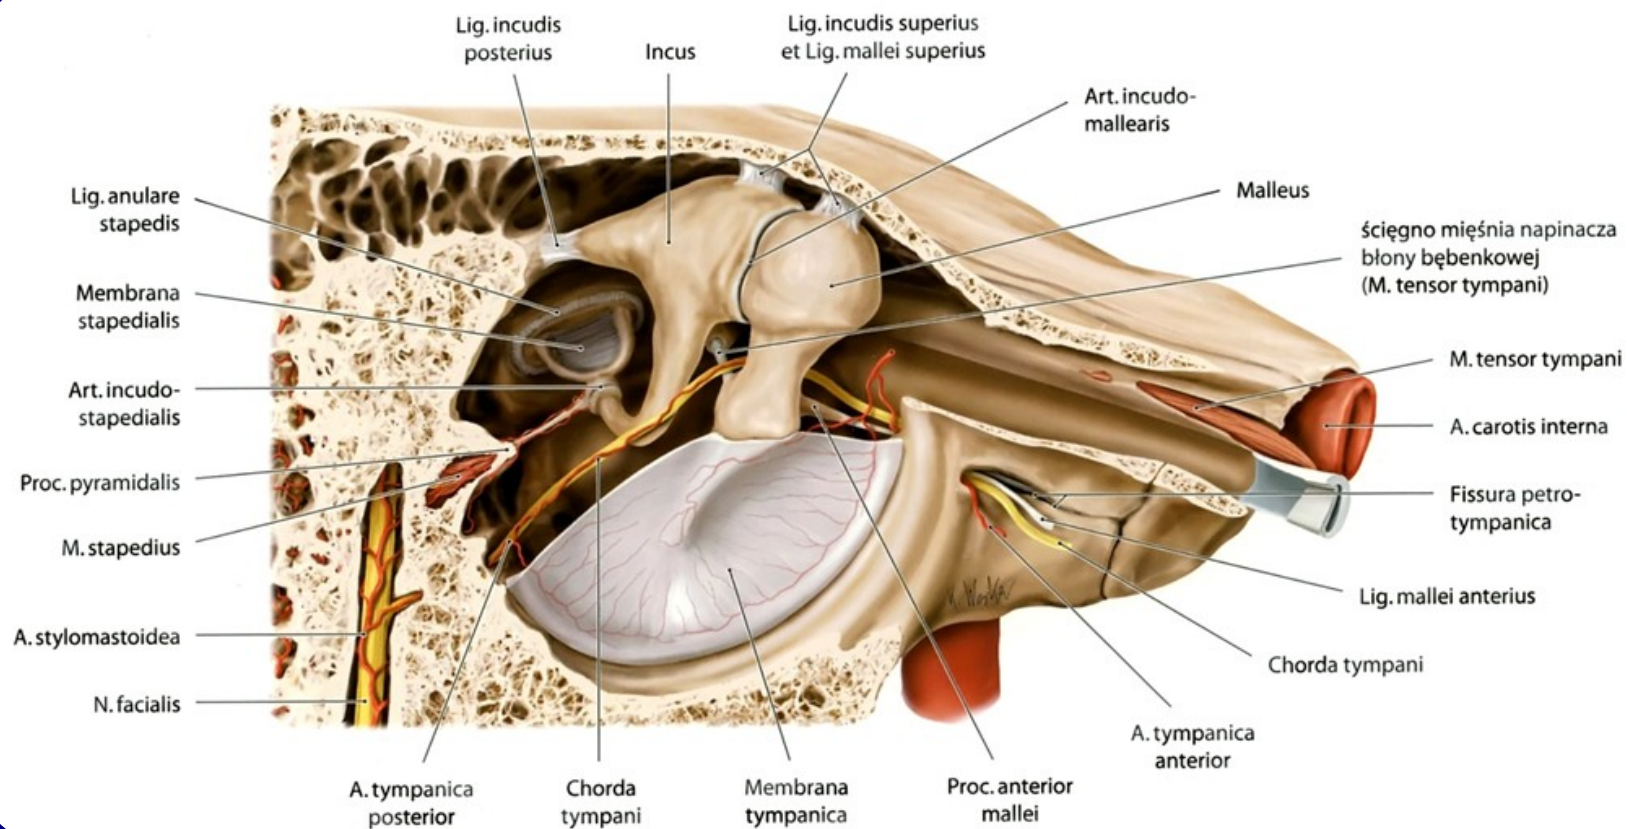

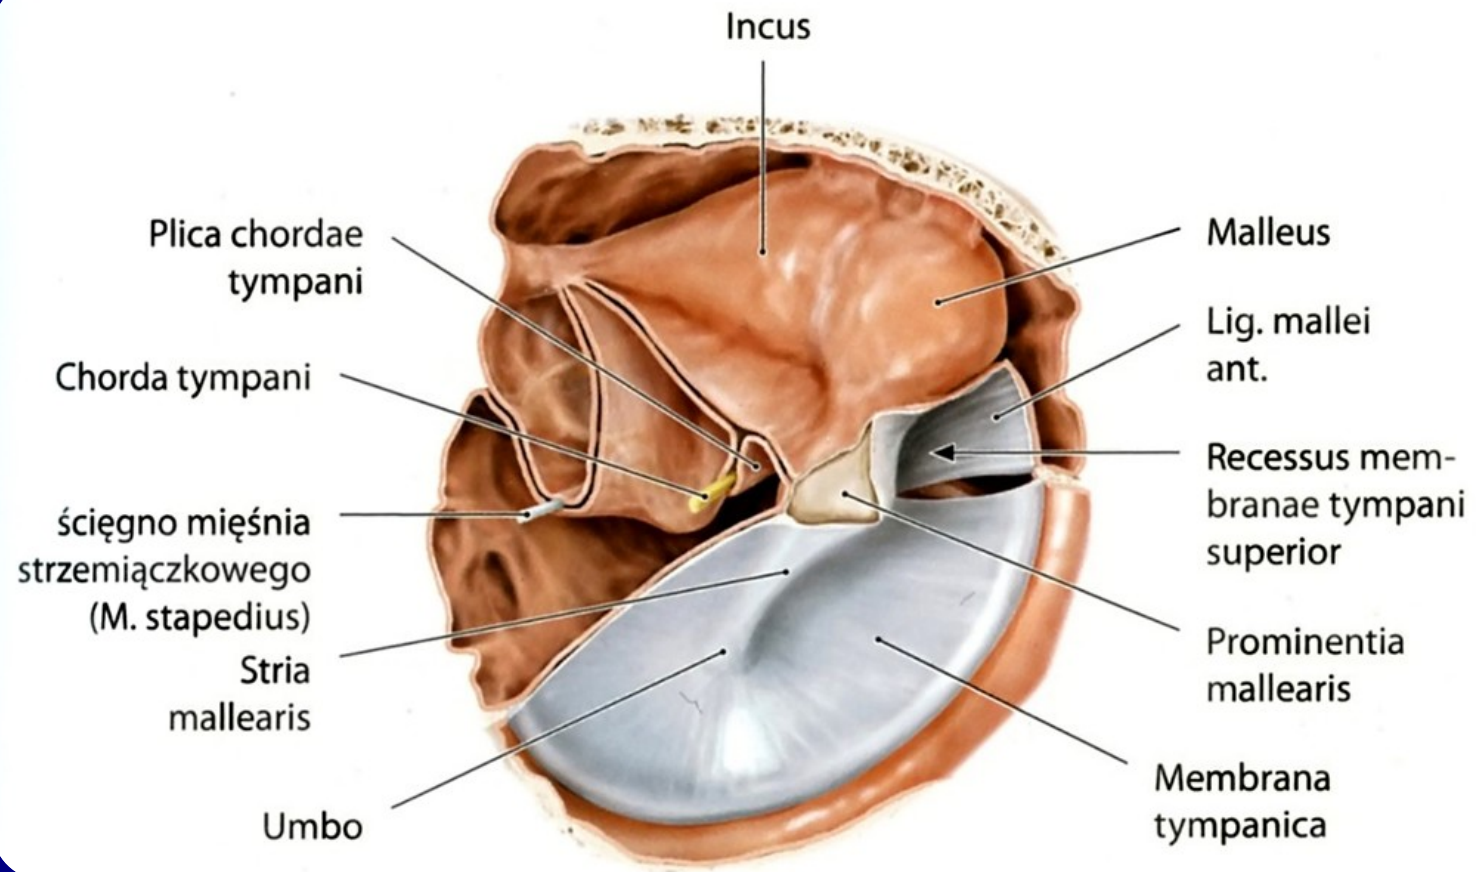

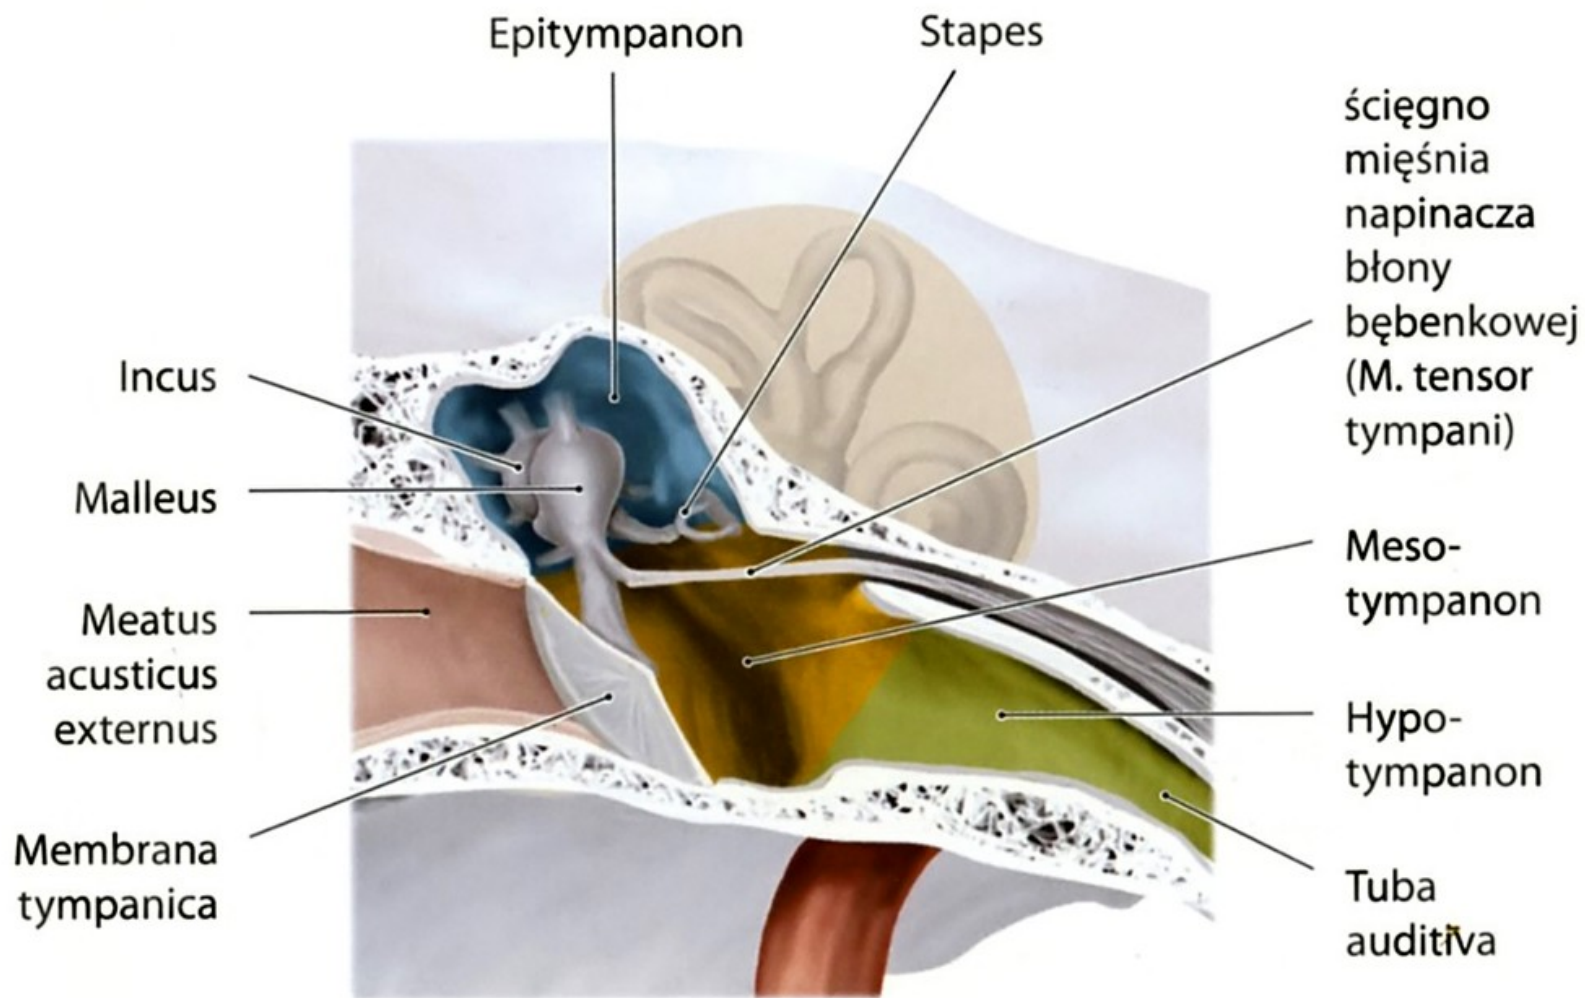

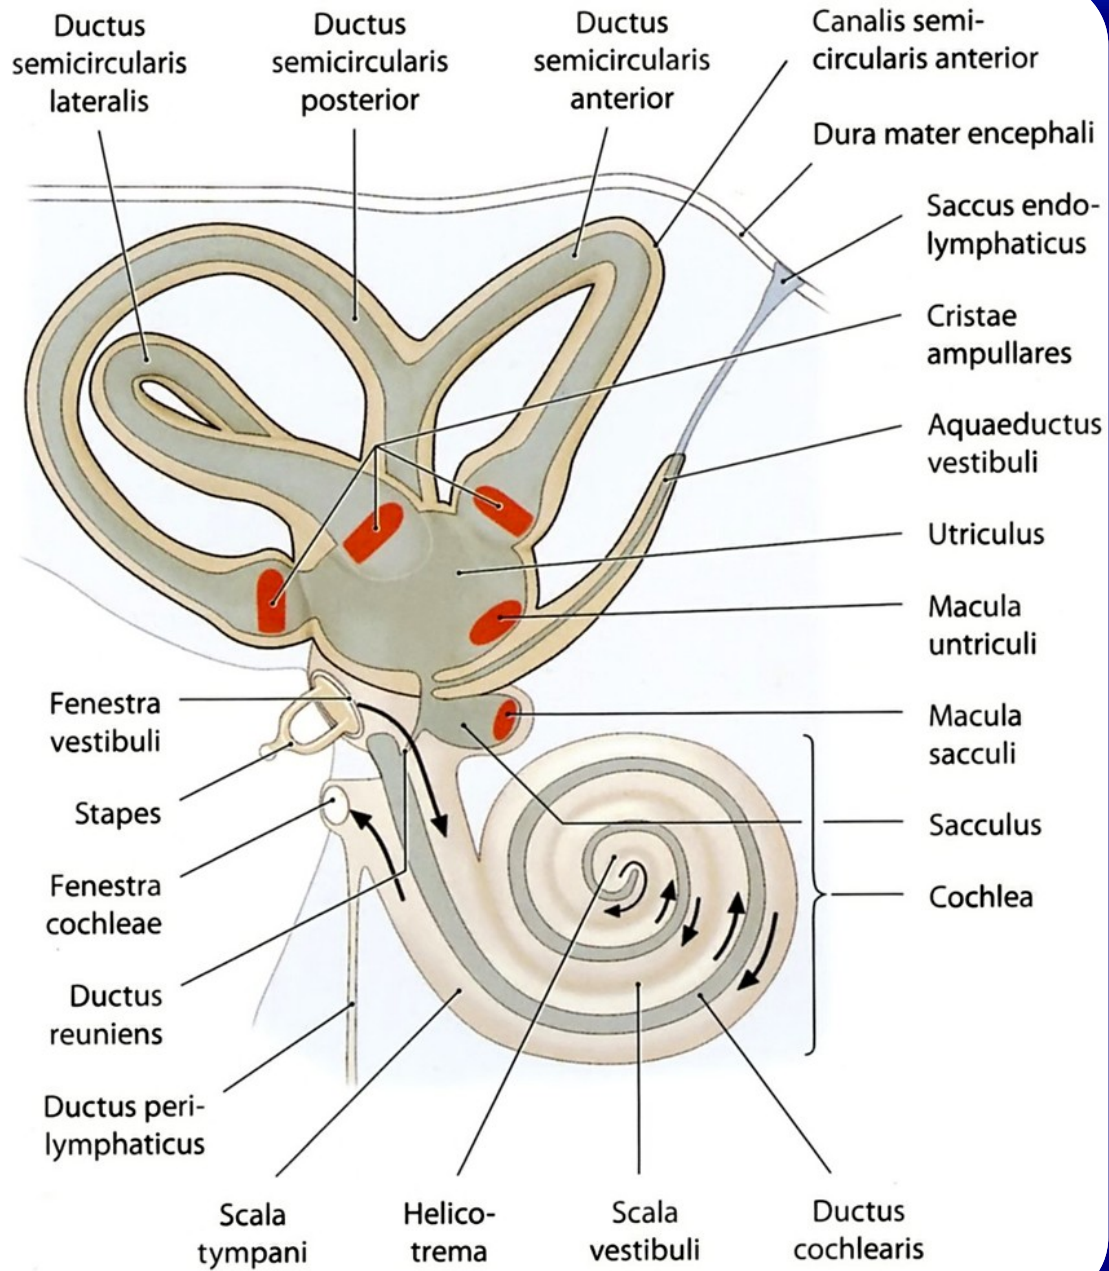

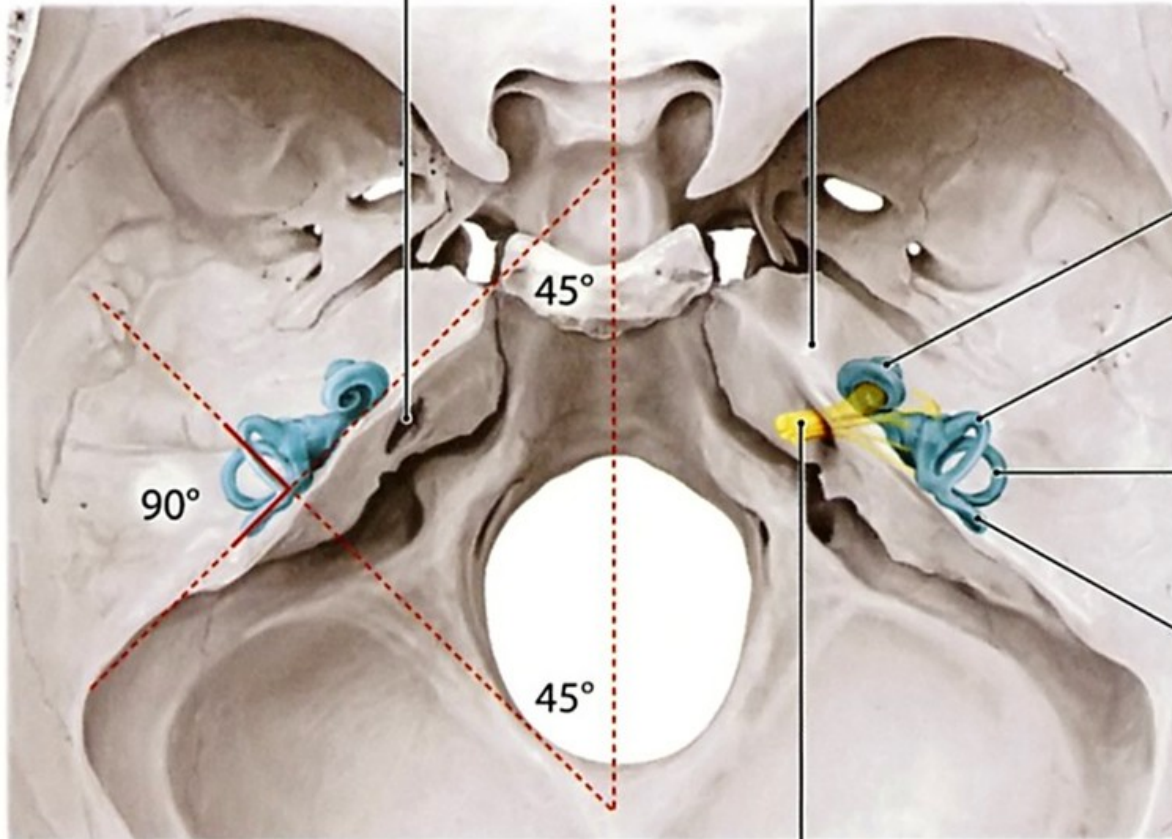

Porus acusticus
internus

Os temporale,
Pars petrosa

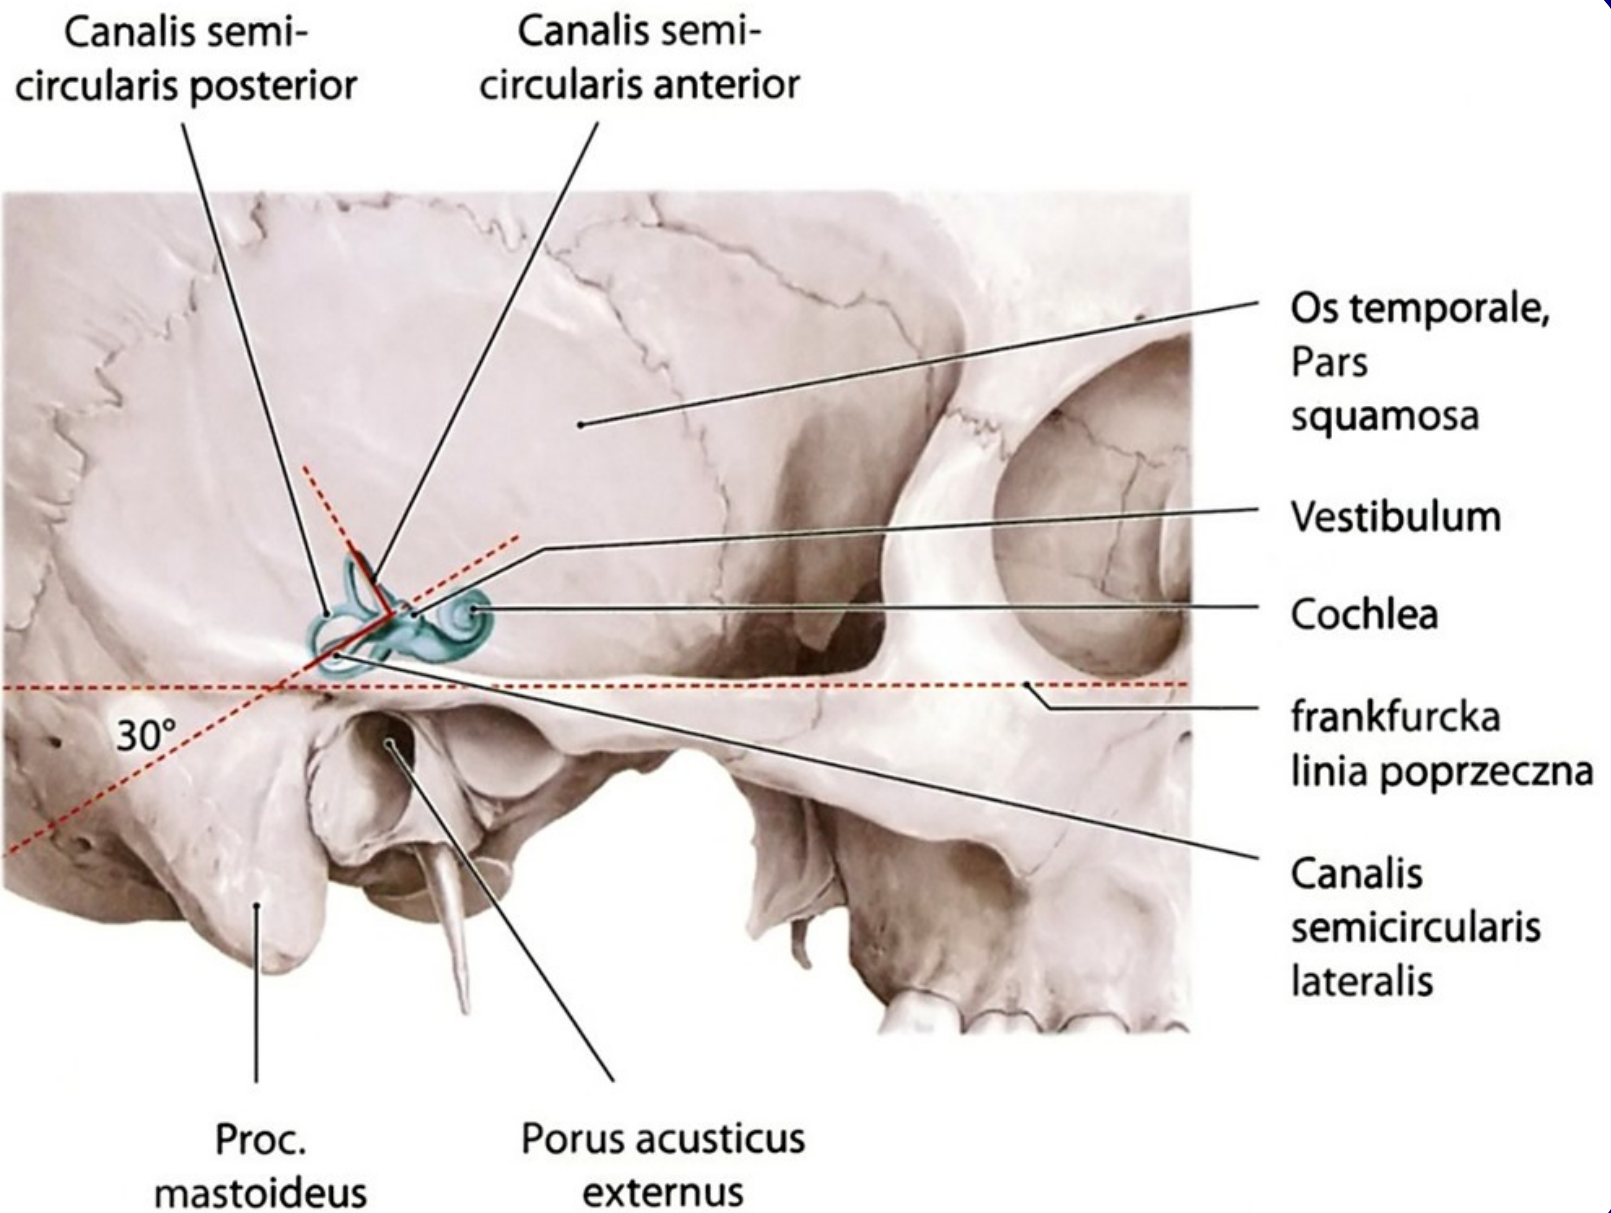

Cochlea

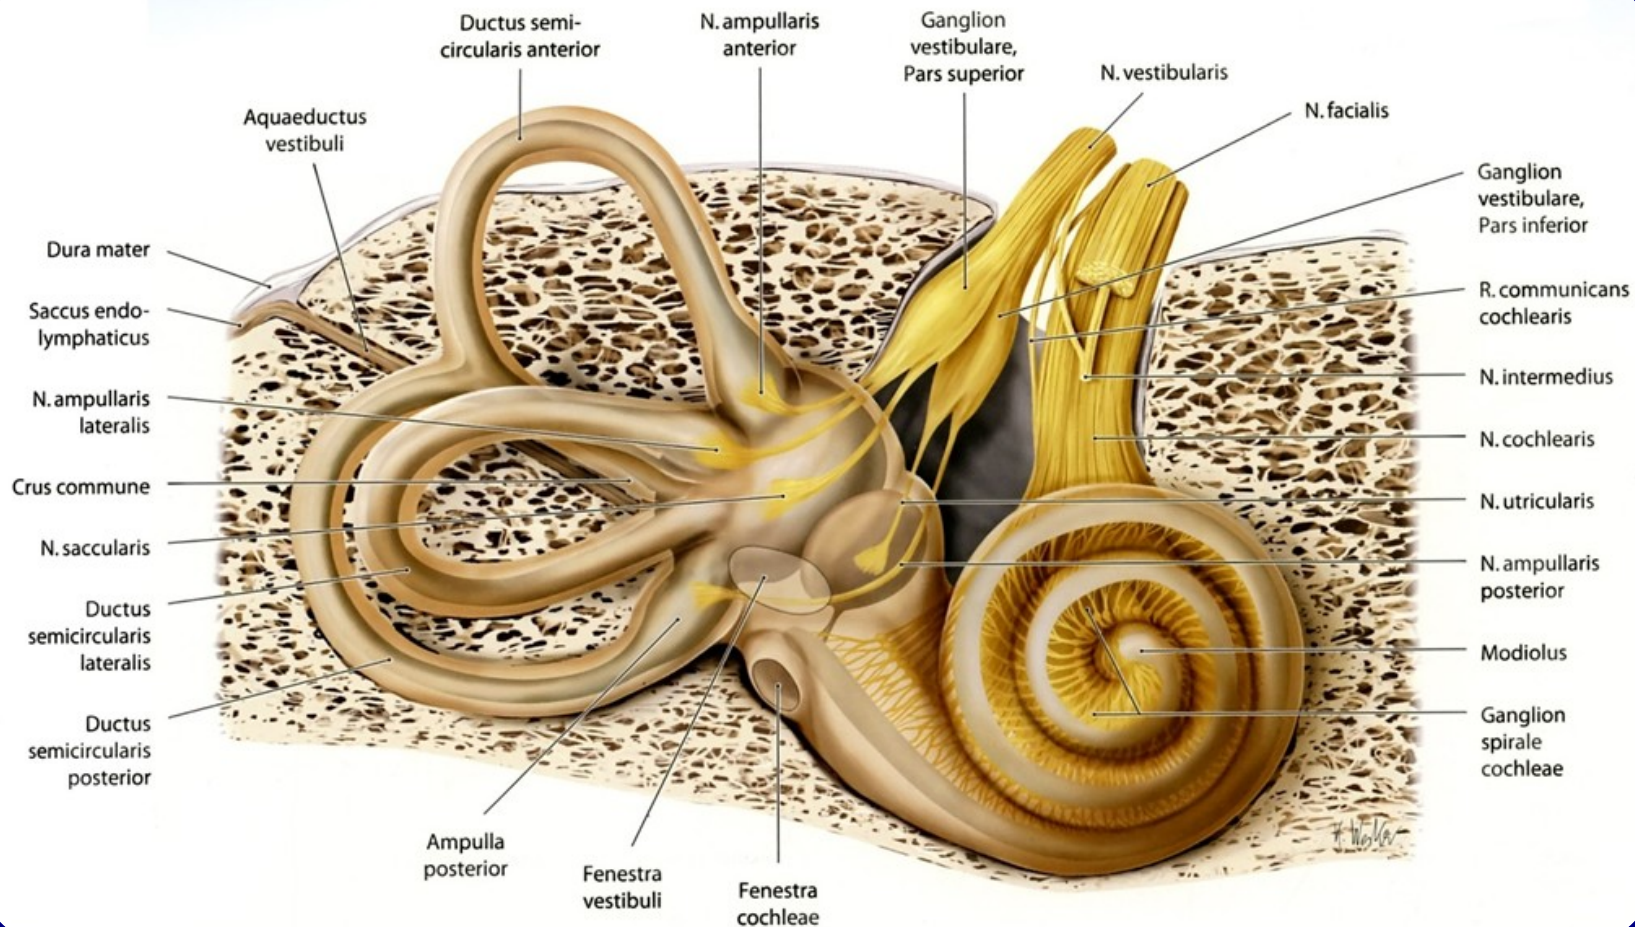

Canalis
semicircularis
anterior

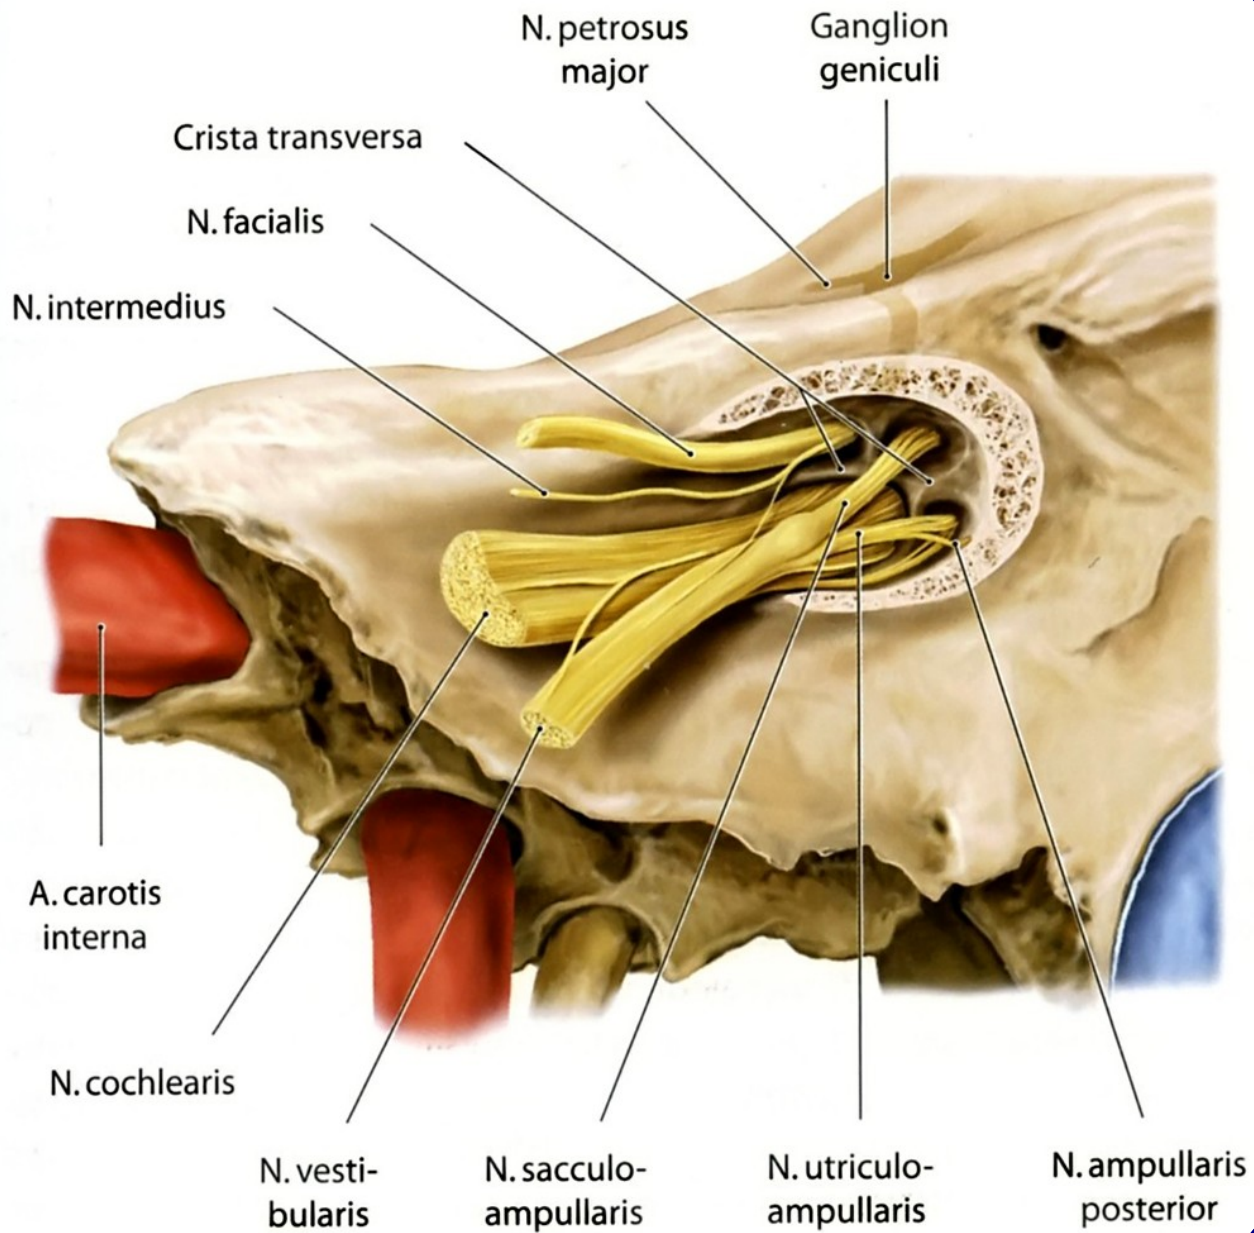

Canalis
semicircularis
lateralis

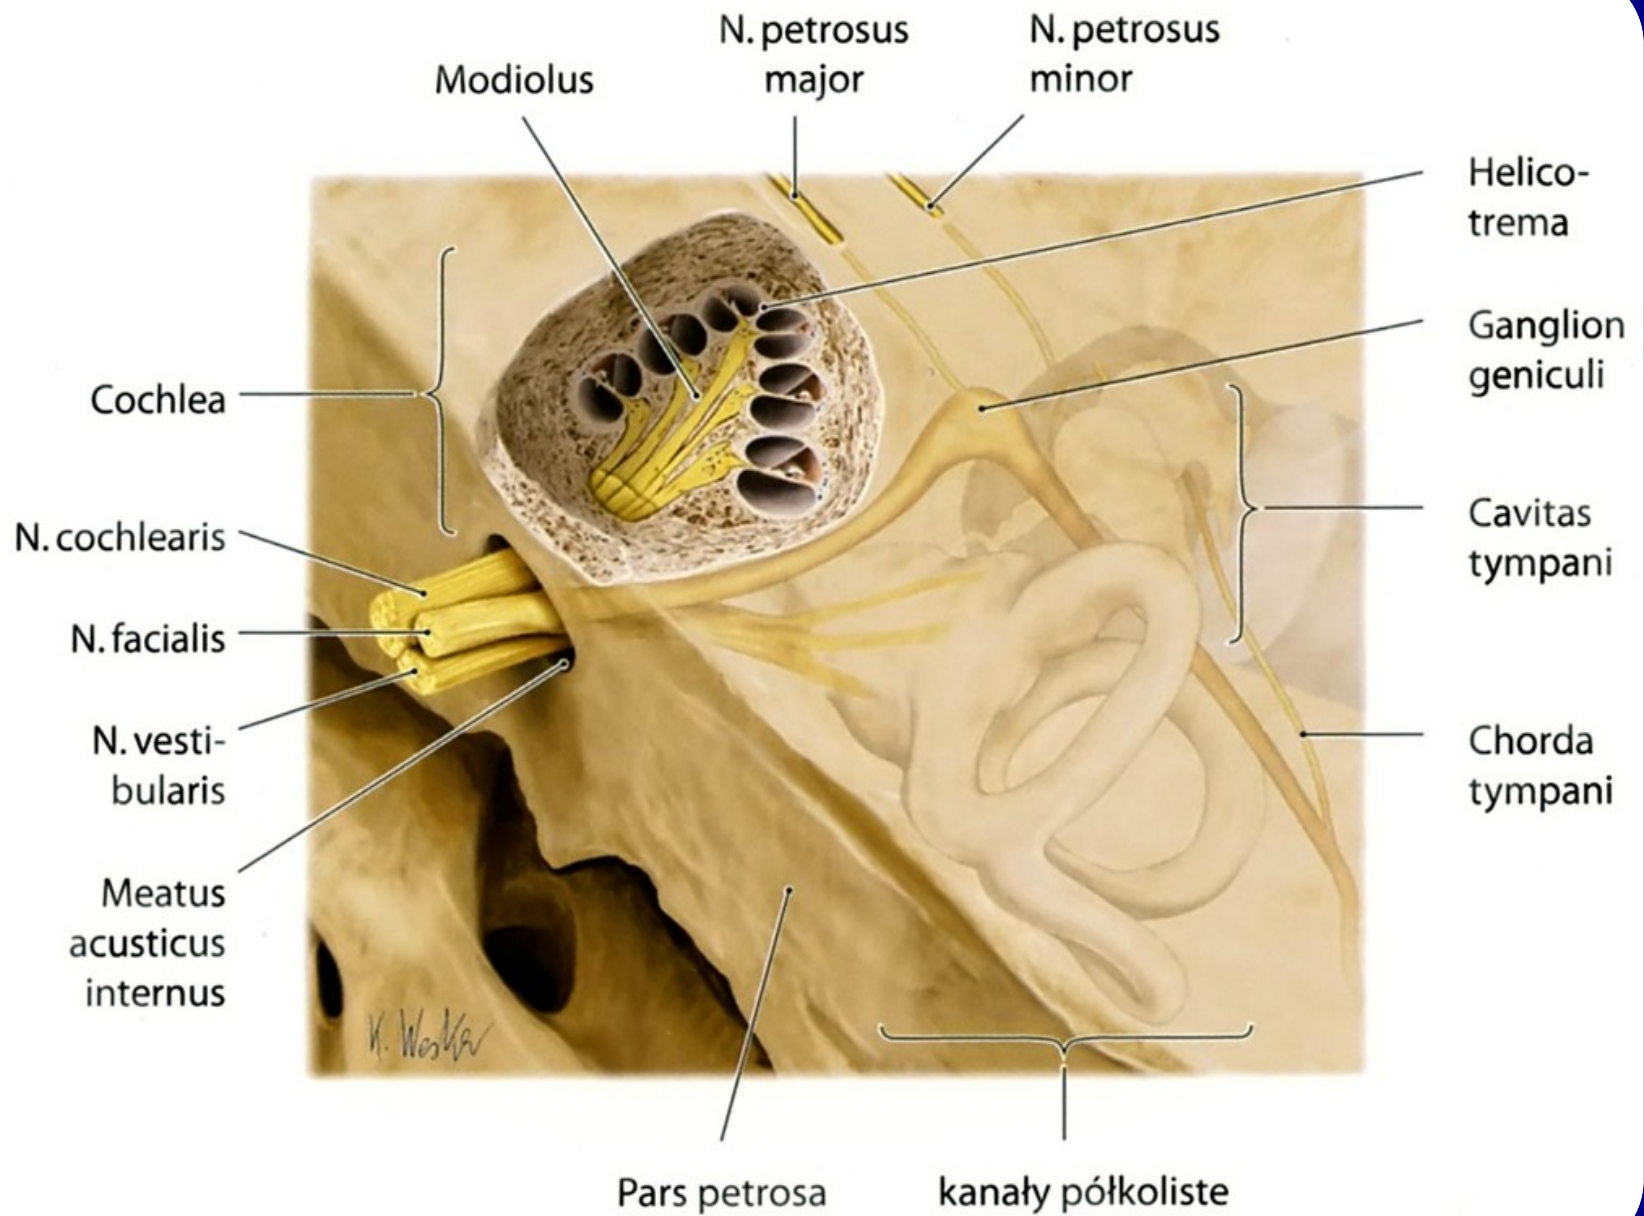

Canalis
semicircularis
posterior

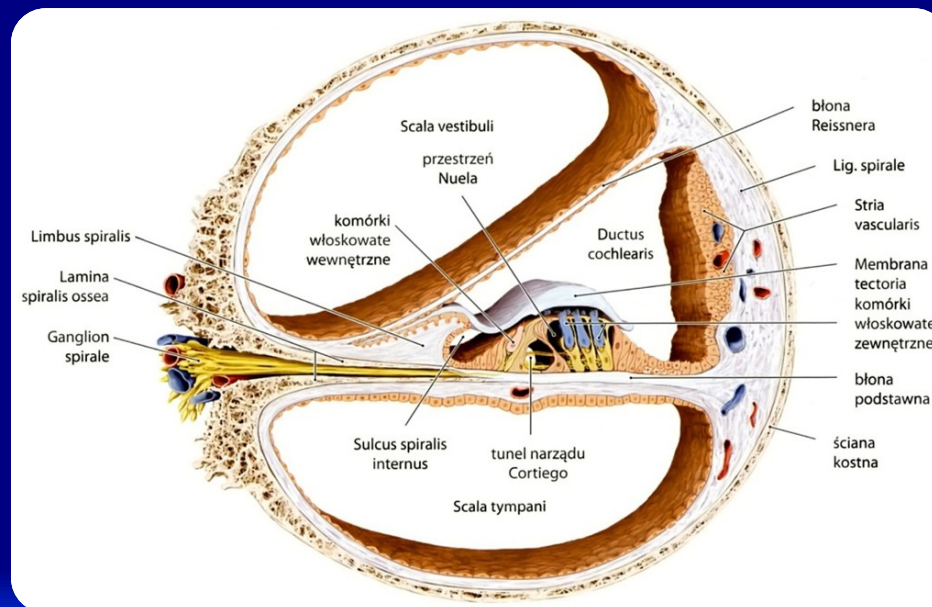

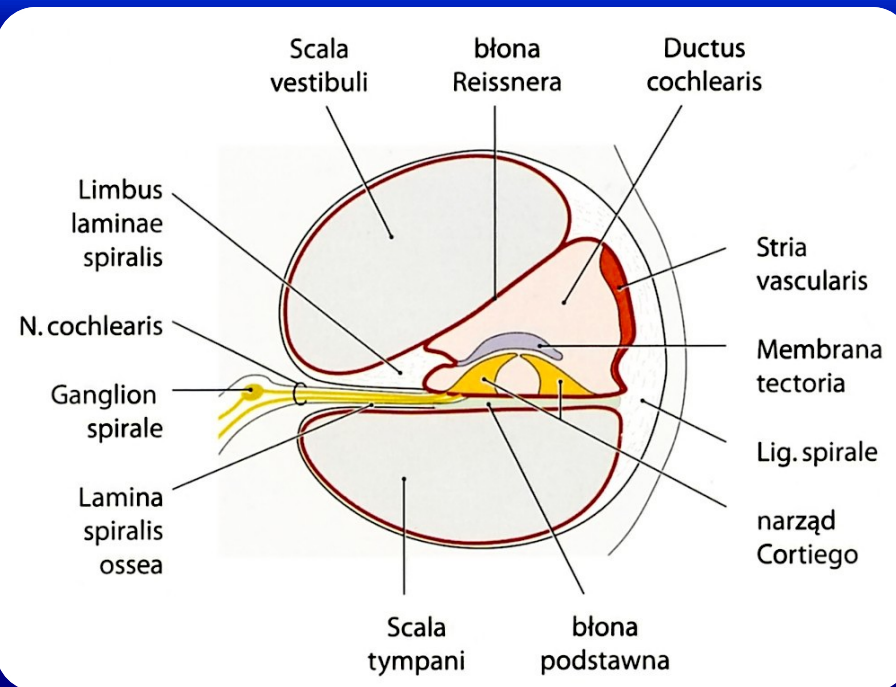

N. facialis,
N. vestibulocochlearis

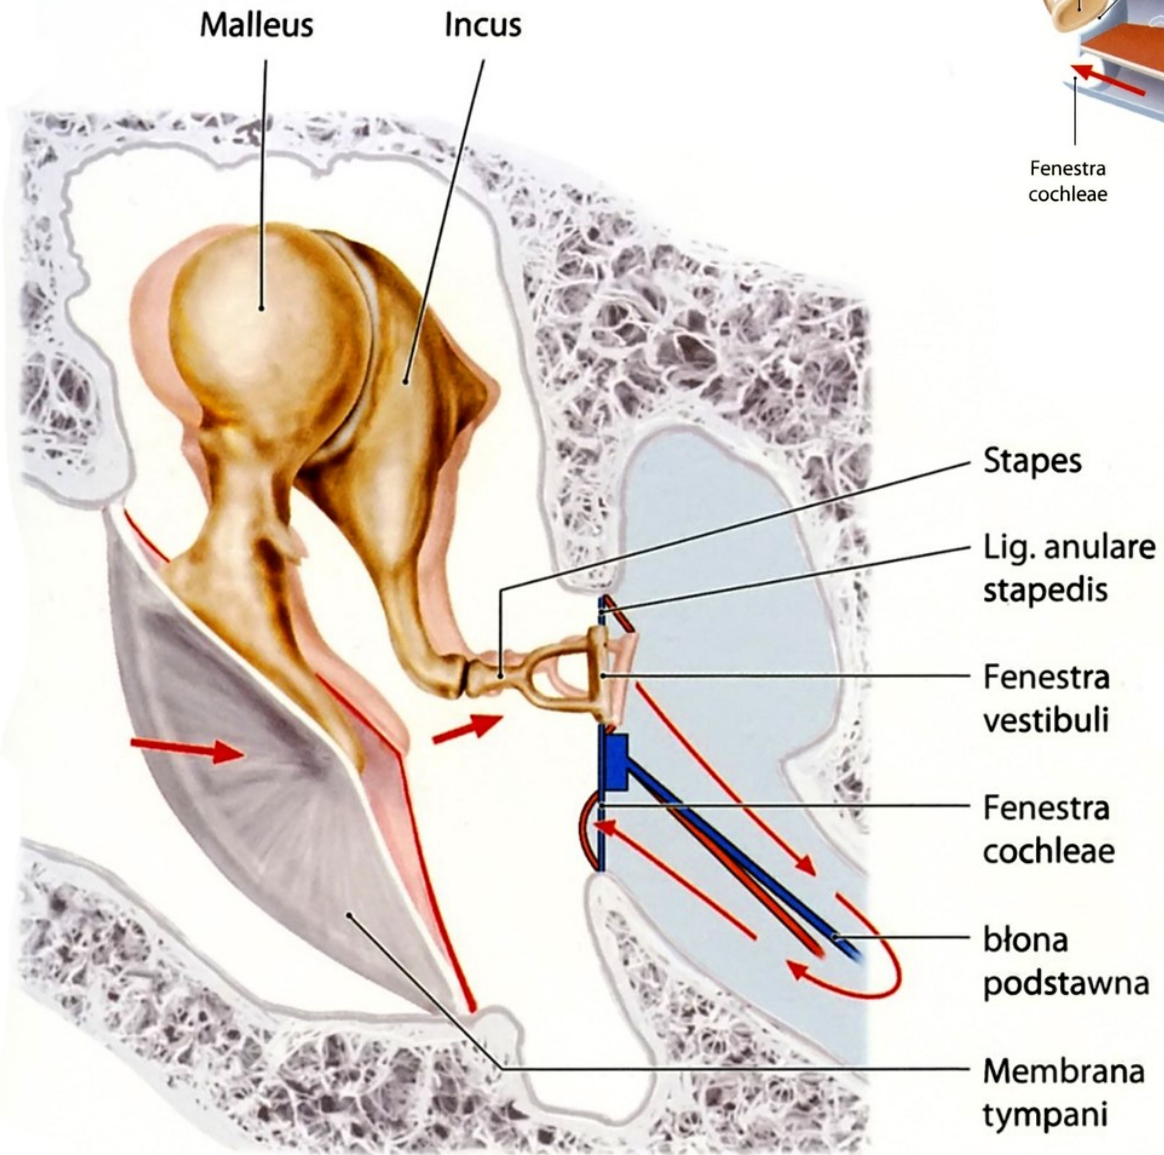

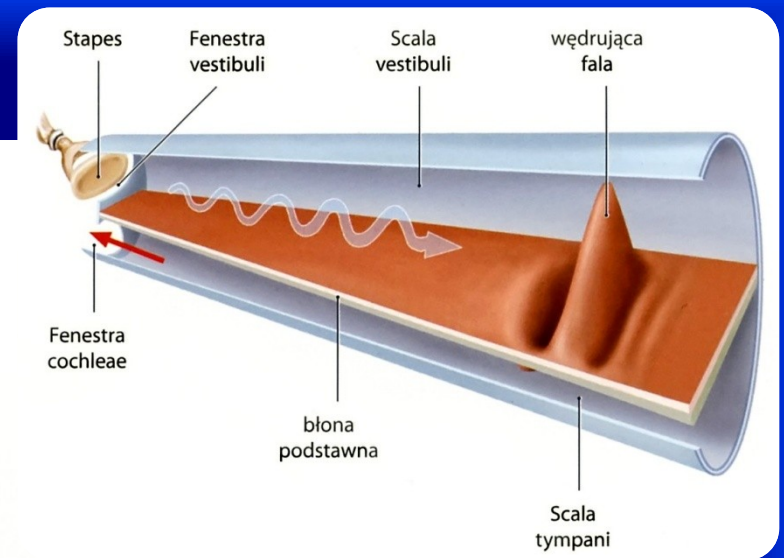

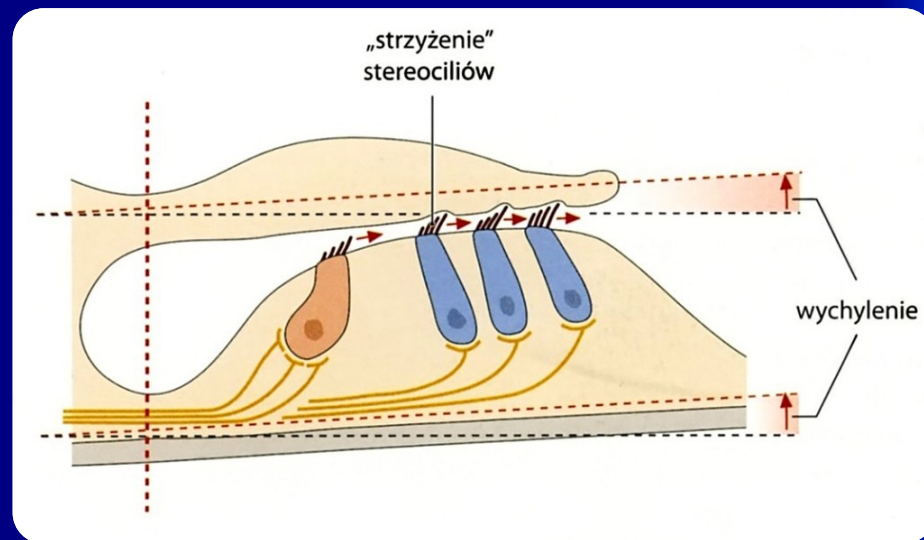

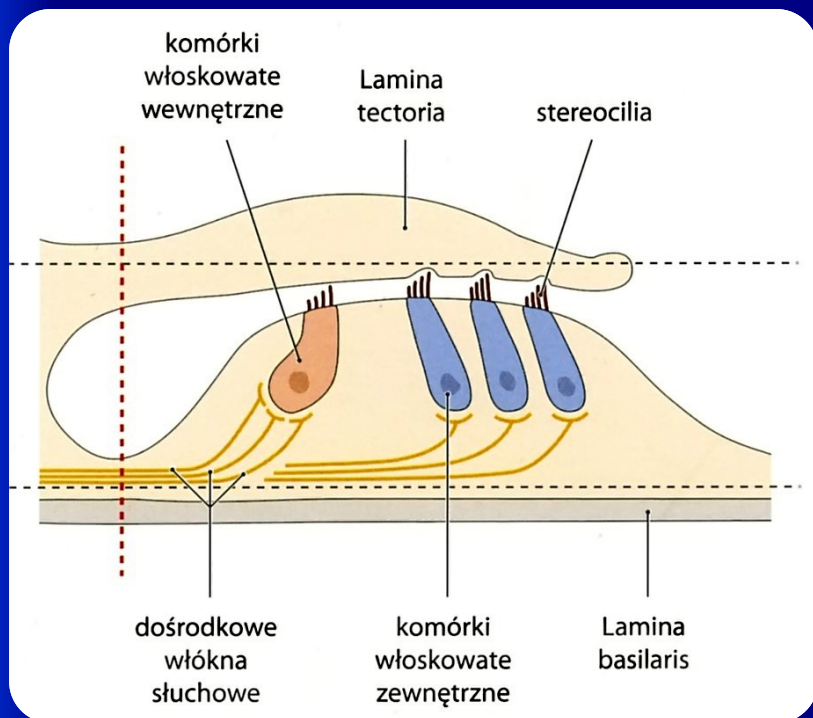

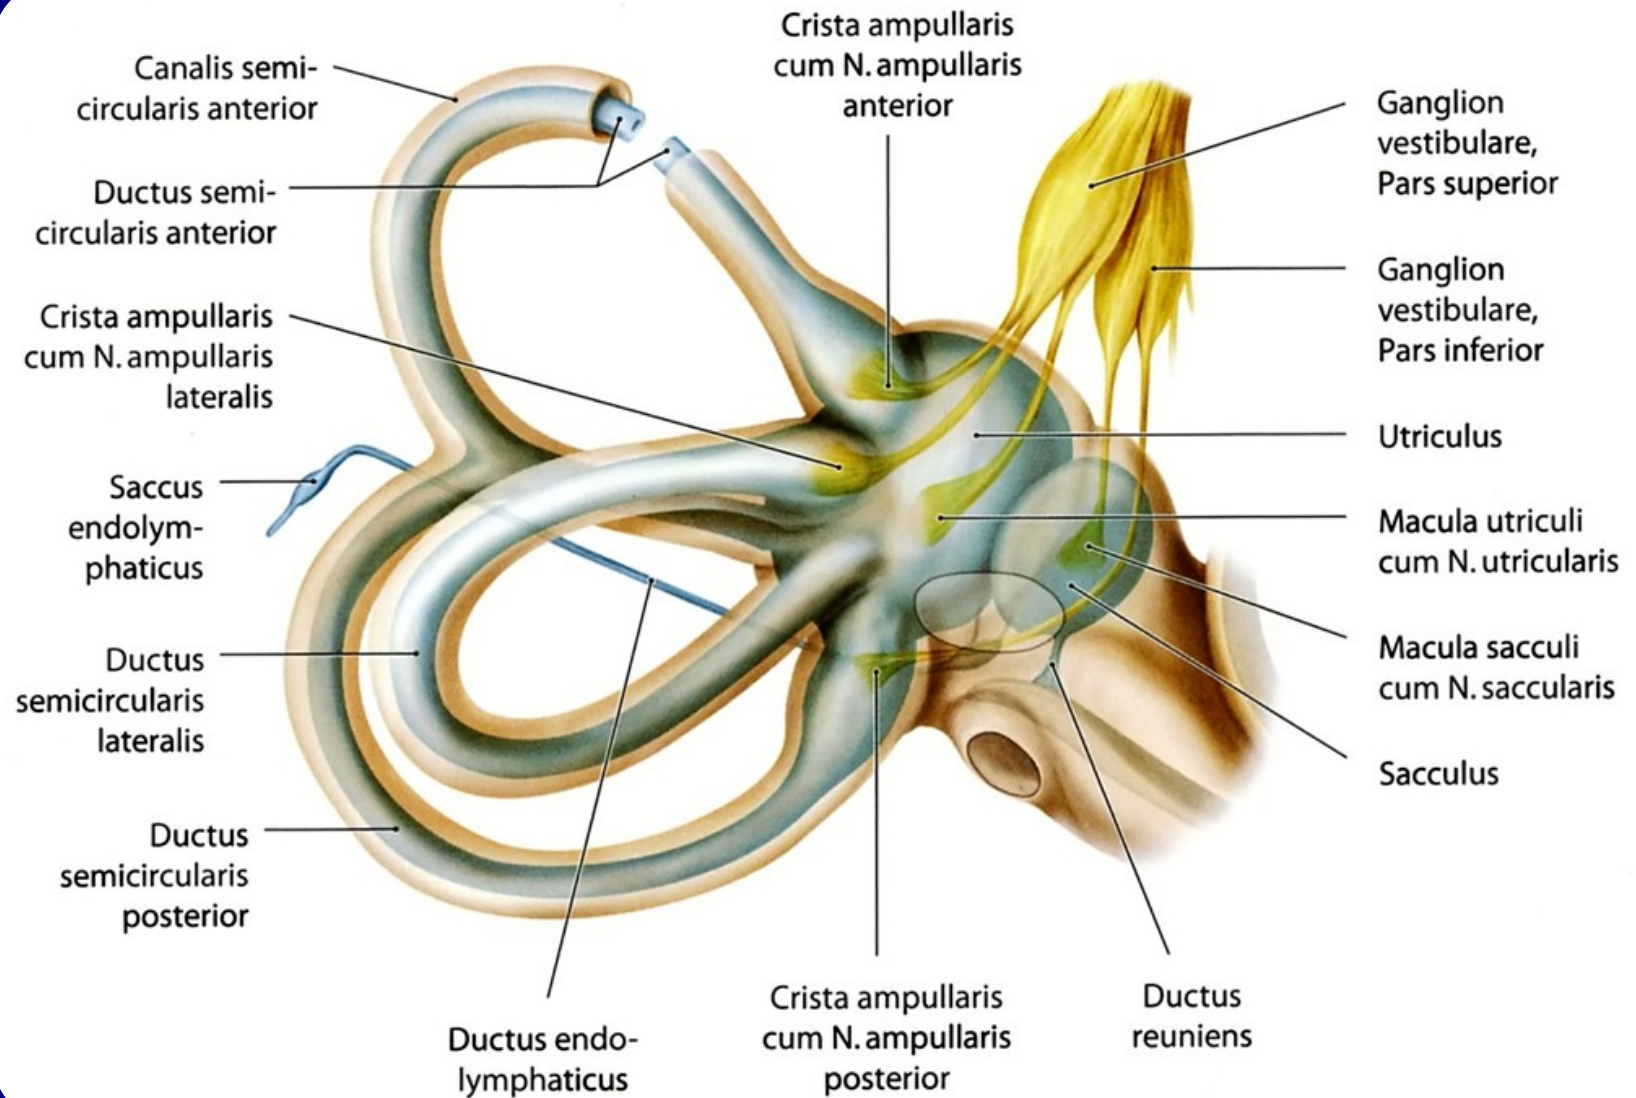

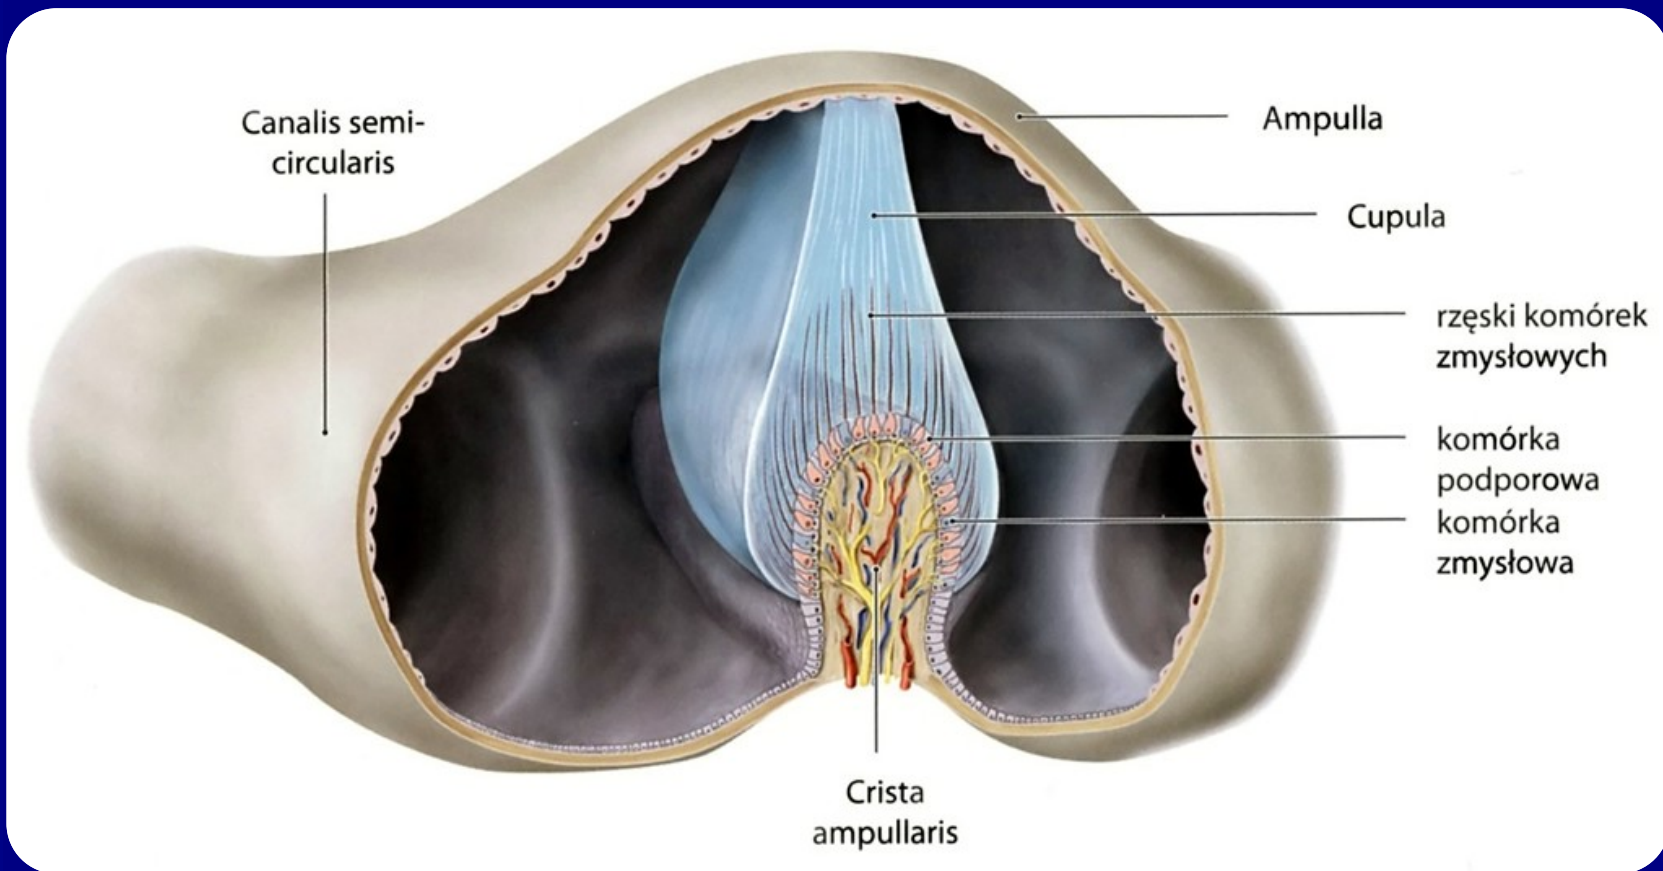

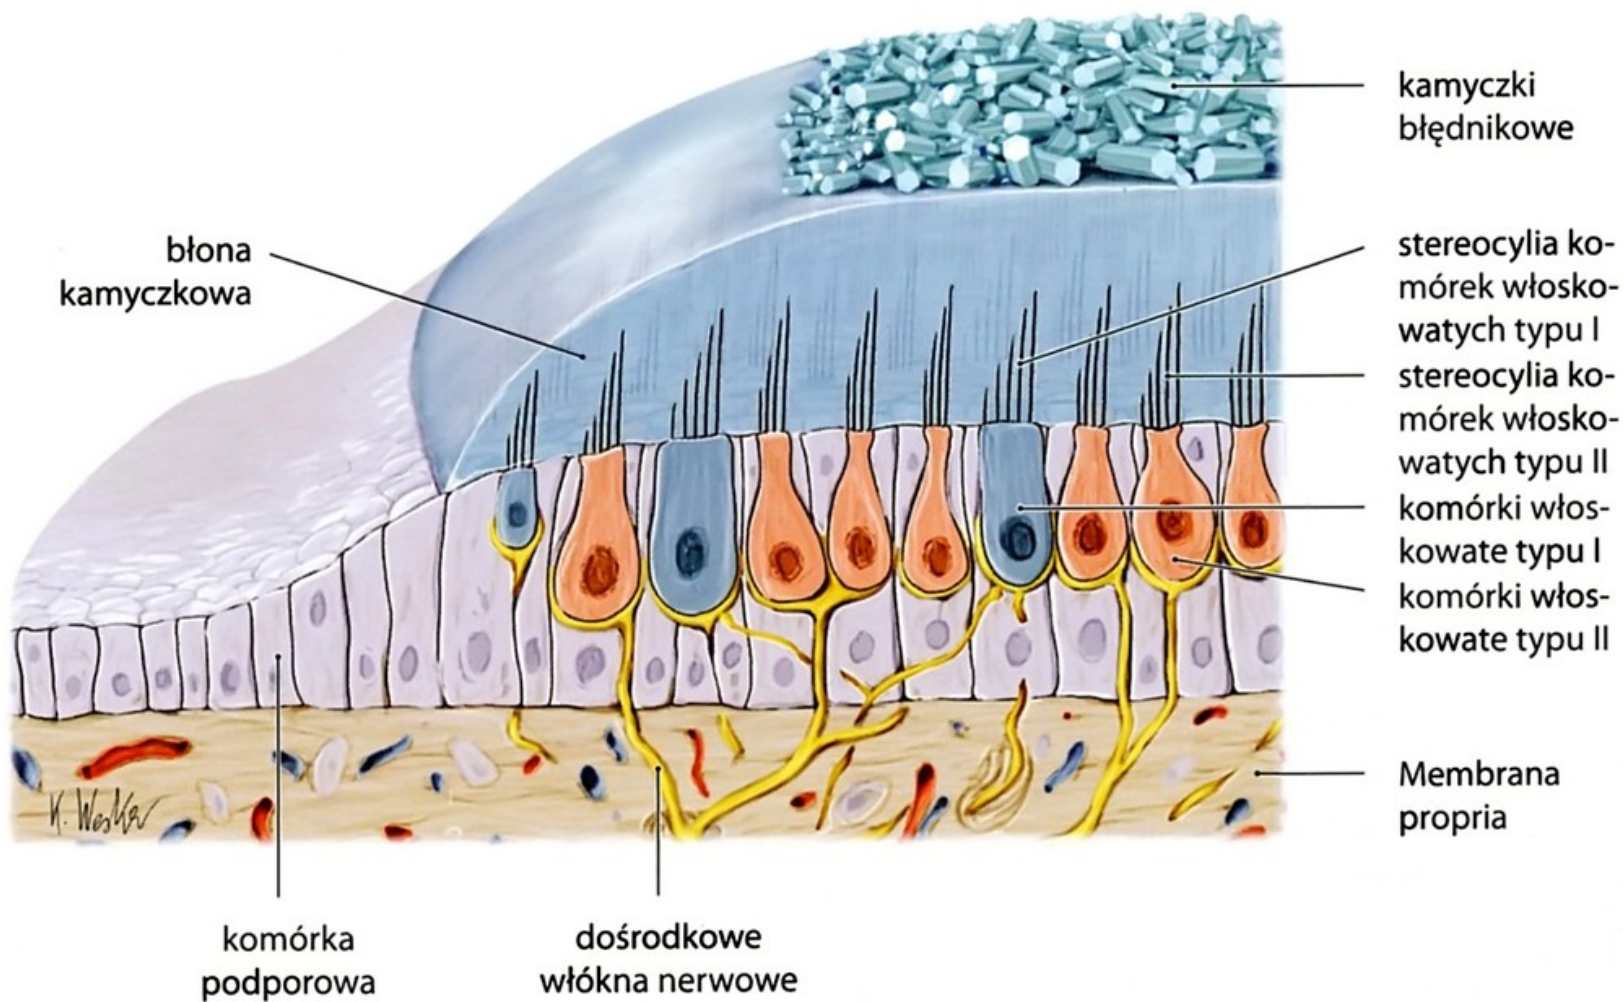

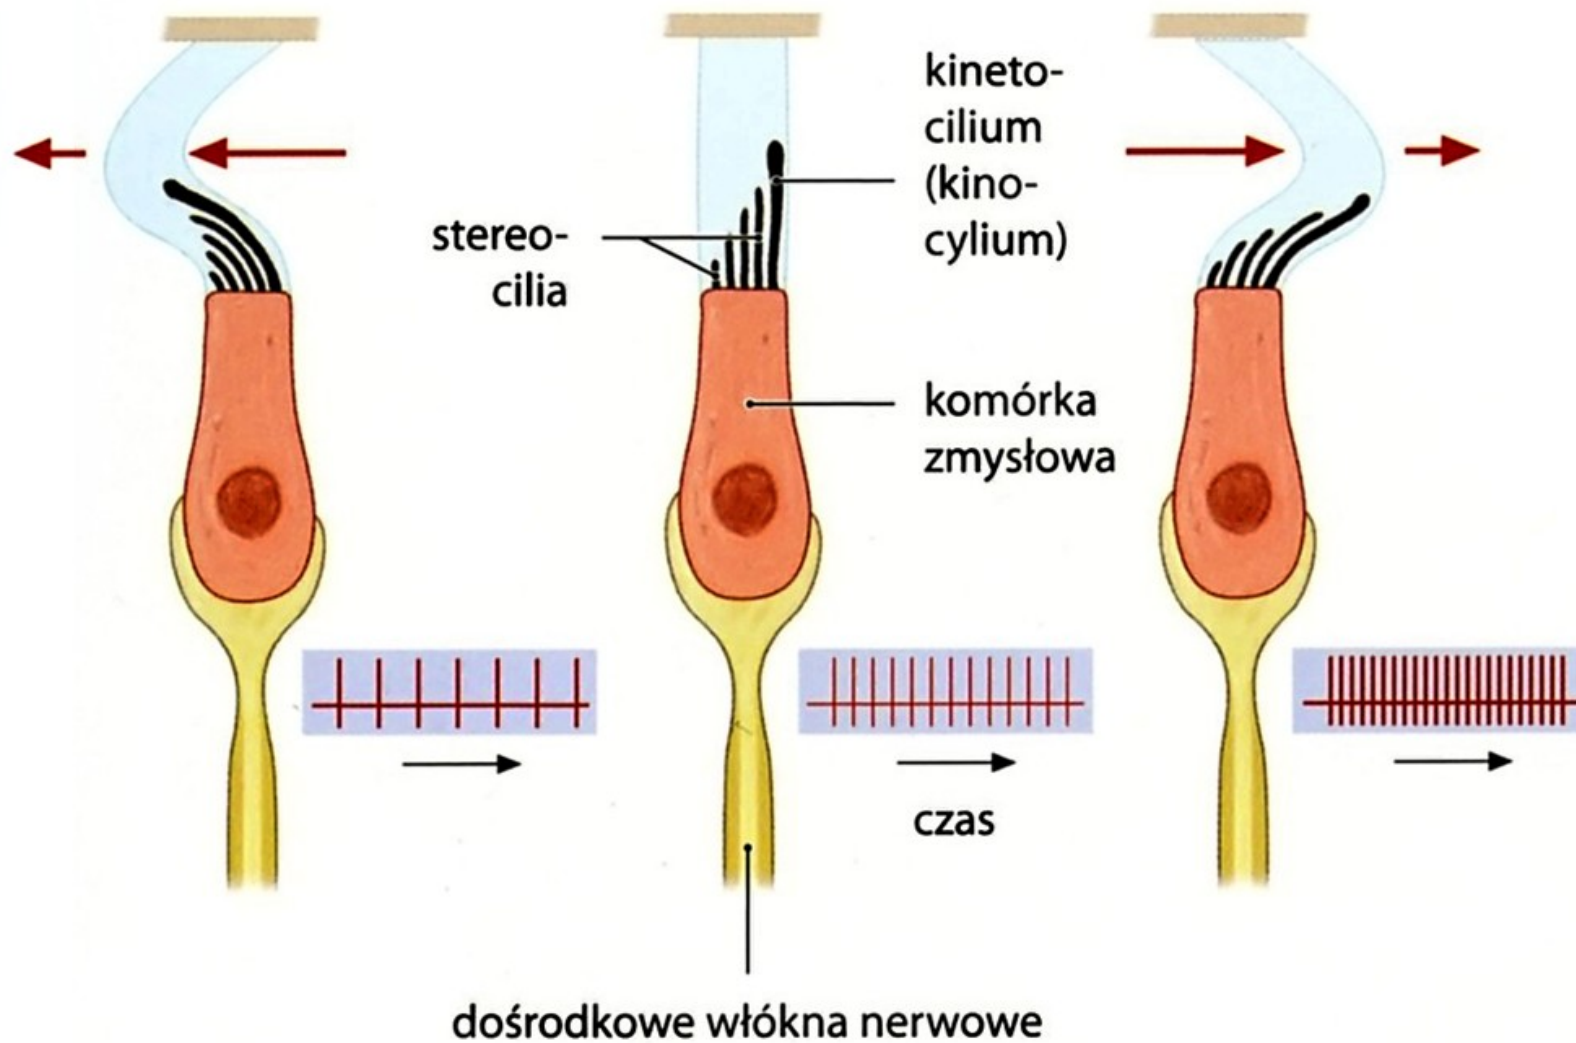

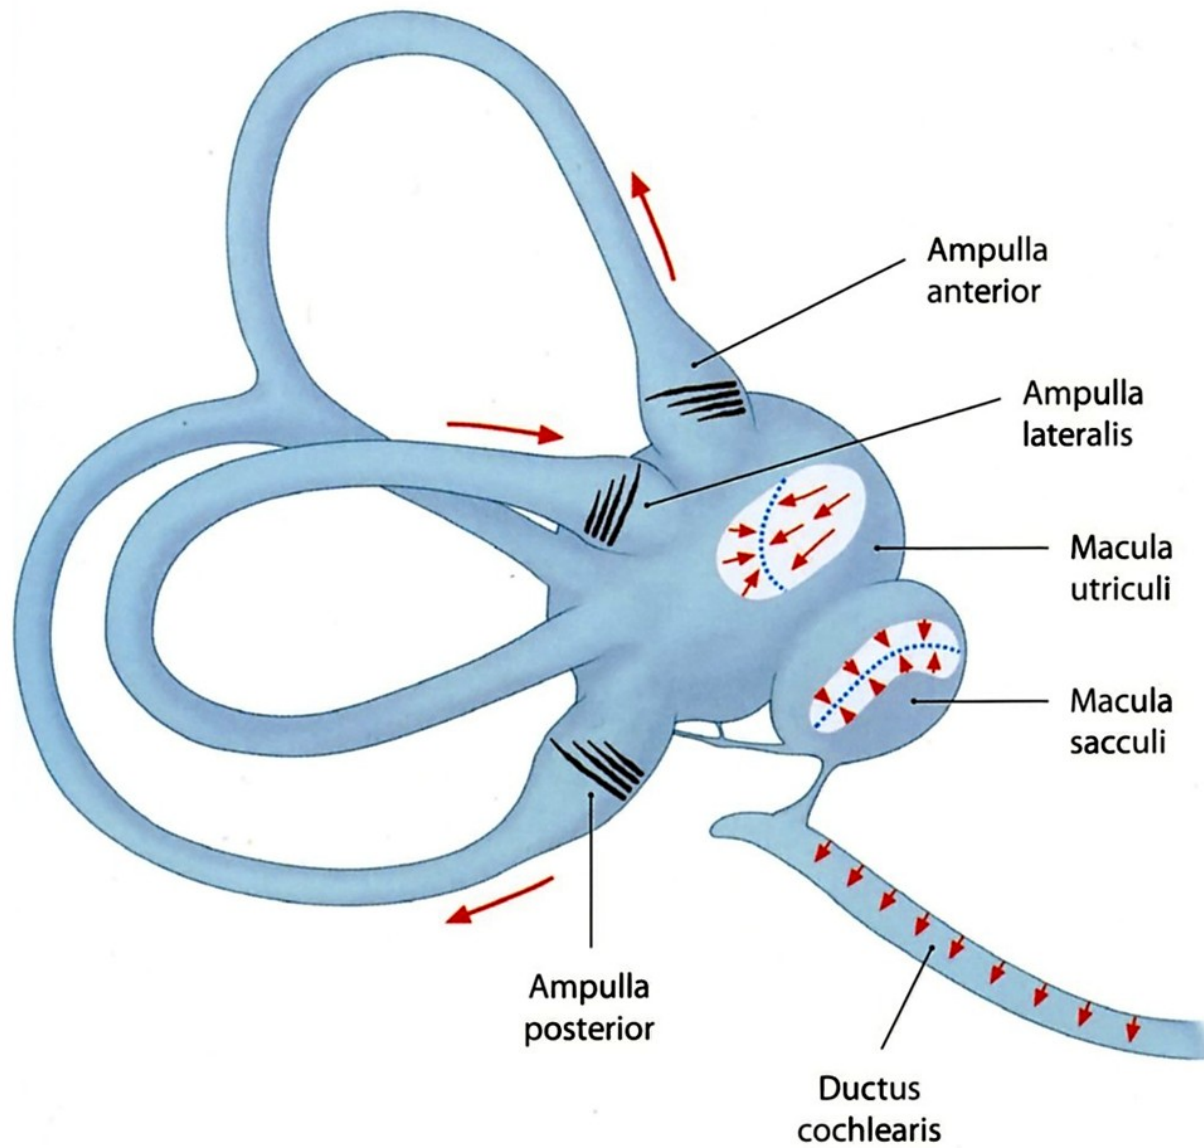

Pochodzenie najważniejszych tętnic jamy bębenkowej

Tętnice	Pochodzenie	Okolica zaopatrywana
tętnice szyjno-bębenkowe (<i>aa. caroticotympanicae</i>)	tętnica szyjna wewnętrzna (<i>a. carotis interna</i>)	trąbka słuchowa i przednia ściana jamy bębenkowej
tętnica rylcowo-sutkowa (<i>a. stylomastoidea</i>)	tętnica uszna tylna (<i>a. auricularis posterior</i>)	tylna ściana jamy bębenkowej, komórki sutkowe (<i>cellulae mastoidae</i>), mięsień strzemiączkowy (<i>m. stapedius</i>), strzemiączko (<i>stapes</i>)
tętnica bębenkowa dolna (<i>a. tympanica inferior</i>)	tętnica gardłowa wstępująca (<i>a. pharyngea ascendens</i>)	dno jamy bębenkowej, wzgórek (<i>promontorium</i>)
tętnica uszna głęboka (<i>a. auricularis profunda</i>)	tętnica szczękowa (<i>a. maxillaris</i>)	błona bębenkowa, dno jamy bębenkowej
tętnica bębenkowa dolna (<i>a. tympanica posterior</i>)	tętnica rylcowo-sutkowa (<i>a. stylomastoidea</i>)	struna bębenkowa (<i>chorda tympani</i>), błona bębenkowa, młoteczek (<i>malleus</i>)
tętnica bębenkowa górna (<i>a. tympanica superior</i>)	tętnica oponowa środkowa (<i>a. meningea media</i>)	mięsień napinacz błony bębenkowej (<i>m. tensor tympani</i>), sklepienie jamy bębenkowej, strzemiączko (<i>stapes</i>)
tętnica bębenkowa przednia (<i>a. tympanica anterior</i>)	tętnica szczękowa (<i>a. maxillaris</i>)	błona bębenkowa, jama sutkowa (<i>antrum mastoideum</i>), młoteczek (<i>malleus</i>), kowadełko (<i>incus</i>)
